

QUADRUPLE LOW-POWER DIFFERENTIAL RECEIVER

Check for Samples: [SN55LBC173-HIREL](#)

FEATURES

- Meets EIA Standards RS-422-A, RS-423-A, RS-485, and CCITT V.11
- Designed to Operate With Pulse Durations as Short as 20 ns
- Designed for Multipoint Bus Transmission on Long Bus Lines in Noisy Environments
- Input Sensitivity: ± 200 mV
- Low-Power Consumption: 20 mA (Max)
- Open-Circuit Fail-Safe Design

DESCRIPTION

The SN55LBC173 is a monolithic quadruple differential line receiver with 3-state outputs designed to meet the requirements of the EIA standards RS-422-A, RS-423-A, RS-485, and CCITT V.11. This device is optimized for balanced multipoint bus transmission at data rates up to and exceeding 10 million bits per second. The four receivers share two ORed enable inputs, one active when high, the other active when low. Each receiver features high input impedance, input hysteresis for increased noise immunity, and input sensitivity of ± 200 mV over a common-mode input voltage range of 12 V to -7 V. Fail-safe design ensures that if the inputs are open circuited, the output is always high. The SN55LBC173 is designed using the Texas Instruments proprietary LinBiCMOS™ technology that provides low power consumption, high switching speeds, and robustness.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

LinBiCMOS is a trademark of Texas Instruments.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of the Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

Copyright © 2013, Texas Instruments Incorporated

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

ORDERING INFORMATION⁽¹⁾

ABSOLUTE MAXIMUM RATINGS⁽¹⁾

over operating free-air temperature range unless otherwise noted

	Value	UNIT
V _{CC} Supply voltage range ⁽²⁾	–0.3 to 7	V
V _I Input voltage range, (A or B inputs)	±25	V
V _{ID} Differential input voltage ⁽³⁾	±25	V
Data and control voltage range	–0.3 to 7	V
T _A Operating free-air temperature range	–55 to 125	°C
T _{stg} Storage temperature range	–65 to 150	°C

- (1) Stresses beyond those listed under *absolute maximum ratings* may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under *recommended operating conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values are with respect to network ground terminal.
- (3) Differential input voltage is measured at the noninverting input with respect to the corresponding inverting input.

RECOMMENDED OPERATING CONDITIONS

	MIN	TYP	MAX	UNIT
V _{CC} Supply voltage	4.75	5	5.25	V
V _{IC} Common-mode input voltage	–7		12	
V _{IH} High-level input voltage	2			
V _{IL} Low-level input voltage			0.8	
V _{ID} Differential input voltage	–6		6	
I _{OH} High-level output current			–8	mA
I _{OL} Low-level output current			16	mA
T _A Operating free-air temperature	–55		125	°C

ELECTRICAL CHARACTERISTICS

over recommended ranges of supply voltage and operating free-air temperature (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP ⁽¹⁾	MAX	UNIT	
V _{IT+}	Positive-going input threshold voltage	I _O = -8 mA			0.2	V	
V _{IT-}	Negative-going input threshold voltage	I _O = 8 mA	-0.2			V	
V _{hys}	Hysteresis voltage (V _{IT+} - V _{IT-})			45		mV	
V _{IK}	Enable input clamp voltage	I _I = -18 mA		-0.9	-1.5	V	
V _{OH}	High-level output voltage	V _{ID} = -200 mV, I _{OH} = -8 mA	3.5	4.5		V	
V _{OL}	Low-level output voltage	V _{ID} = -200 mV, I _{OL} = 8 mA		0.3	0.5	V	
		V _{ID} = -200 mV, I _{OL} = 8 mA, T _A = 125°			0.7		
I _{OZ}	High-impedance-state output current	V _O = 0 V to V _{CC}			±20	µA	
I _I	Bus input current	A or B inputs	Other inputs at 0 V	V _{IH} = 12 V, V _{CC} = 5 V	0.7	1.15	mA
				V _{IH} = 12 V, V _{CC} = 0 V	0.8	1.15	
				V _{IH} = -7 V, V _{CC} = 5 V	-0.5	-0.9	
				V _{IH} = -7 V, V _{CC} = 0 V	-0.4	-0.9	
I _{IH}	High-level input current	V _{IH} = 5 V			±20	µA	
I _{IL}	Low-level input current	V _{IL} = 0 V			-20	µA	
I _{OS}	Short-circuit output current	V _O = 0			-80	-120	mA
I _{CC}	Supply current	Outputs enabled, I _O = 0, V _{ID} = 5 V			11	20	mA
		Outputs disabled			0.9	1.4	

(1) All typical values are at 25°C and with a 5 V supply.

SWITCHING CHARACTERISTICS

V_{CC} = 5 V, C_L = 15 pF, over operating free-air temperature range (unless otherwise noted)

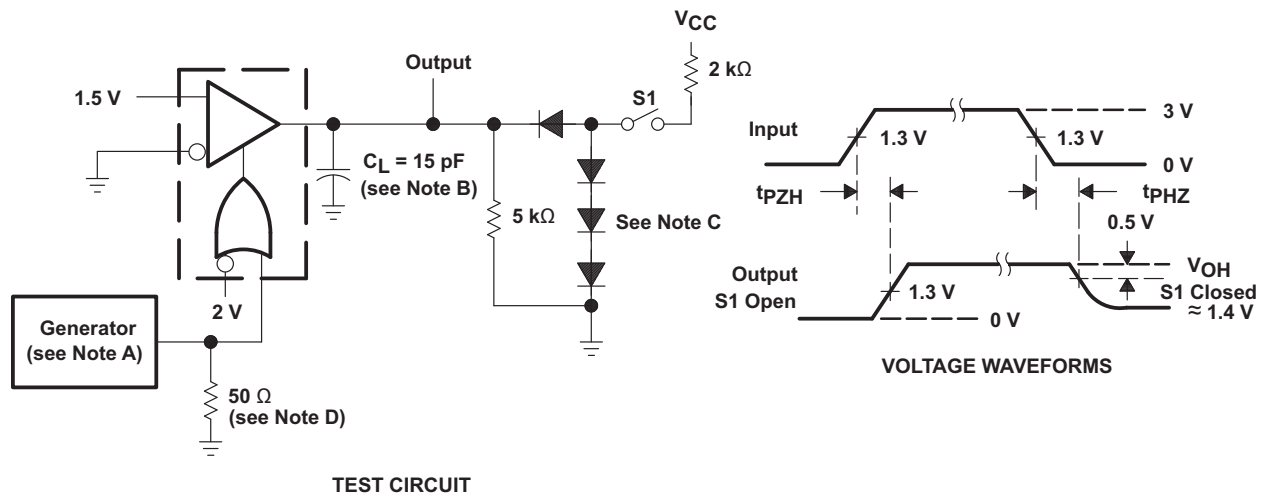

PARAMETER		TEST CONDITIONS	T _A	MIN	TYP	MAX	UNIT
t _{PHL}	Propagation delay time, high-to-low-level output	V _{ID} = -1.5 V to 1.5 V, See Figure 1	25°C	11	22	30	ns
			-55°C to 125°C	11		35	
t _{PLH}	Propagation delay time, low-to-high-level output	V _{ID} = -1.5 V to 1.5 V, See Figure 1	25°C	11	22	35	ns
			-55°C to 125°C	11		35	
t _{PZH}	Output enable time to high level	See Figure 2	25°C		17	40	ns
			-55°C to 125°C			45	
t _{PZL}	Output enable time to low level	See Figure 3	25°C		18	30	ns
			-55°C to 125°C			35	
t _{PHZ}	Output disable time from high level	See Figure 2	25°C		30	40	ns
			-55°C to 125°C			55	
t _{PLZ}	Output disable time from low level	See Figure 3	25°C		25	40	ns
			-55°C to 125°C			45	
t _{sk(p)}	Pulse skew (t _{PHL} - t _{PLH})	See Figure 1	25°C		0.5	6	ns
			-55°C to 125°C			7	
t _t	Transition time	See Figure 1	25°C		5	10	ns
			-55°C to 125°C			16	

PARAMETER MEASUREMENT INFORMATION

- A. The input pulse is supplied by a generator having the following characteristics: PRR = 1 MHz, duty cycle $\leq 50\%$, $t_r \leq 6$ ns, $t_f \leq 6$ ns, $Z_O = 50 \Omega$.
- B. C_L includes probe and jig capacitance.

Figure 1. t_{pd} and t_t Test Circuit and Voltage Waveforms

- A. The input pulse is supplied by a generator having the following characteristics: PRR = 1 MHz, duty cycle $\leq 50\%$, $t_r \leq 6$ ns, $t_f \leq 6$ ns, $Z_O = 50 \Omega$.
- B. C_L includes probe and jig capacitance.
- C. All diodes are 1N916 or equivalent.
- D. To test the active-low enable \overline{G} , ground G and apply an inverted input waveform to \overline{G} .

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples
SN55LBC173MKGD1	ACTIVE	XCEPT	KGD	0	100	TBD	Call TI	N / A for Pkg Type	-55 to 125		Samples
SN55LBC173MKGD2	ACTIVE	XCEPT	KGD	0	10	TBD	Call TI	Call TI	-55 to 125		Samples

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer:The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
