Interconnect Solutions for the LED Market

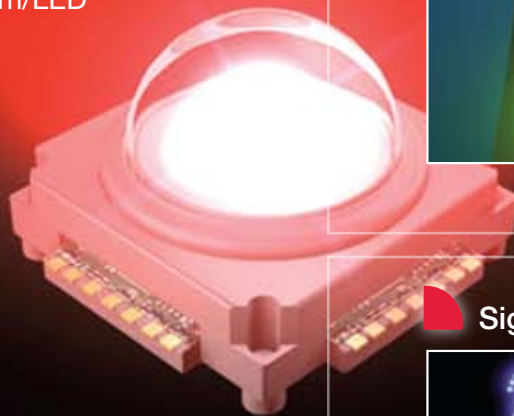

LED's connect with FCI

With today's focus on miniaturization and our environment, LED applications are in the spotlight becoming the most efficient light source available. This technological development opens up many new applications and requires an innovative partner.

FCI brings its superior product performance and outstanding technical support to meet the needs of your next LED application. Whether your product is a LED fixture, power supply or controller, FCI is able to support with signal, power, board or cable-to-board and even IP68-proof solutions.

Please learn more on www.fci.com/LED which provides various product selector tools for easy access to product details:

- drawings
- test reports
- 3D images
- data sheets
- sample services
