

MEZZSelect™

FCI's MezzSelect™ product portfolio consists of a number of mezzanine connectors addressing a wide range of markets and applications, including (high speed) data- networking, industrial, instrumentation, telecommunications and medical.

The MezzSelect™ product selector complements this offering with a web based guide to the product combination that best suits a specific application.

A number of selection charts are the core of FCI's MezzSelect™ product selector

MezzSelect™ helps designers of printed circuit boards to complete their mezzanine designs FASTER, EASIER and with LESS RISK.

By offering MezzSelect™ to its customers FCI helps reduce the complexity that mezzanine interconnect designs bring. MezzSelect™ also helps reduce the design lead time as it provides instant access to technical information on each of the mezzanine products that the MezzSelect™ portfolio consists of.
