WAKEFIELD SOLUTIONS, INC.
ADDS A 500 TON ALUMINUM EXTRUSION PRESS

Wakefield Solutions, Inc., one of North America's oldest and largest aluminum extruders is pleased to announce the addition of a 500 ton aluminum extrusion press to be installed and operating at our Pelham, New Hampshire operations.

To meet the needs of our growing global customers, this new state-of-the-art capital equipment provides Wakefield with a total of five presses capable of producing aluminum extrusions ranging from .010 pounds per foot to 14 pounds per foot. This new 500 ton press will produce complex miniature extrusions with tolerances as close as .001 inch.

Since 1957, Wakefield Solutions has been extruding complex aluminum profiles for demanding customer applications. The company's 53 million pound annual extrusion capacity and fabrication equipment lineup consists of:

- **3,000 ton; 11-inch press**
- **1,950 ton; 9-inch press**
- **1,800 ton; 7-inch press**
- **1,650 ton; 7-inch press**
- **500 ton; 4-inch press**
- **115 CNC Machining Centers**
- **22 Punch Presses**
- **Full Fabrication and Assembly Services**

Wakefield Solutions, Inc., is a global leader in innovative thermal management solutions, aluminum extrusion and fabrication, powdered metal, and plastic components. Continuous improvement in our engineering and manufacturing operations provides our global customers with solutions that grow their businesses.
