Amphenol® Amphe-Lite™ Non-Magnetic and “Combo-C” Harsh Environment Connectors

The non-magnetic Amphe-Lite is another variation of the highly reliable industrial multi-pin interconnect that is ideal for a variety of applications.

MRI equipment is one example of an application where the nonmagnetic Amphe-Lite connector is the ideal solution. With up to 128 size 22D contacts in one connector, the non-magnetic Amphe-Lite is one of the highest density connectors, and it is one of the few 100% non-magnetic connectors available today. Not only are 22D, 20, 16 and 12 size standard contacts available, but also “Combo-C” arrangements of high speed copper contacts can be incorporated. Amphenol ACT flex circuits can also be supplied attached to the receptacle for easy installation.

Non-magnetic Amphe-Lite connectors are made of a durable corrosion resistant composite material. IP67 sealing grommets and interfacial seals are standard. These connectors are offered in three receptacle shell styles (wall mount, in-line and jam nut) and a straight plug. The coarse triple start thread allows for complete mating in a single 360° turn of the coupling nut.

Ordering information for Non-Magnetic Amphe-Lite connectors - Just add (NMG) suffix to any standard Amphe-Lite part number.

Standard unplated Amphe-Lite part numbering: AL06U13-35S

Non-Magnetic Amphe-Lite part numbering: AL06U13-35S (NMG)

AMPHE-LITE "COMBO-C"

Amphenol's "Combo-C" inserts allow for the use of standard signal / power, highspeed copper contacts and fiber optics in a single connector: standard signal and power are available in contact sizes 22D to 10; high-speed copper are available in contact sizes 16, 12 and 8 coax, sizes 12 and 8 twinax, and sizes 12, 10 and 8 triax. The newest high-speed copper contacts available are the size 8 quadrax and size 8 differential twinax. These contacts are capable of supporting data rates up to 2 Gb/sec and bandwidths of up to

3 GHz. Fiber optic termini are available for many of the single-mode and multi-mode fiber used in the industry. There are over 30 "Combo-C" insert arrangements available for the Amphe-Lite connector series. (These are listed on the back.) The number of contacts available ranges from 2 to 46 per connector. Amphe-Lite "Combo-C" connectors are used in various applications in the medical, heavy equipment and rail/mass transit market segments.
