Presentation

CROUZET CONTROL

Widely recognised for over 50 years as the specialist in electromechanical, electronic technology and software engineering, Crouzet Control experience in time management, physical and mechanical values has resulted in an extensive automation components offer that includes logic controllers, timers, control relays, counters, ratemeters, machine safety equipment, and temperature controllers.

Simple to use, Crouzet Control products are easy to program and install.

With operations around the globe, Crouzet Control is constantly monitoring its customers' needs. Its sales teams, technicians and designers combine all their skills to adapt products to customer specifications, both in terms of the application and cost.

Crouzet Control also ensures that its products are manufactured in compliance with quality and environmental standards (factories certified ISO 9001, 14001 and OHSAS 18001, eco-design).

With its industrial and logistic flexibility Crouzet Control is able to deliver products, whether small-scale or mass production items, in the best possible timescale.

In this new Panorama, Crouzet Control presents:

A new range of redesigned Safety Relays for machine safety applications with new functions and easy installation.

New Chronos 2 timers (17.5 mm) substituting the existing range with an improved electronic and mechanical design allowing added robustness and reliability.

CROUZET AUTOMATION

Crouzet Automation, supported by an **experienced sales and technical team** and an **easy-to-use software**, is the adaptable alternative for any automation solution. Crouzet Automation is the perfect solution for any specialized or demanding need.

These products are specifically suited for integration in a **wide range of applications** such as waste and water treatment, access control, renewable energies, building equipment, industrial machines and transportation.

InnoVista Sensors™

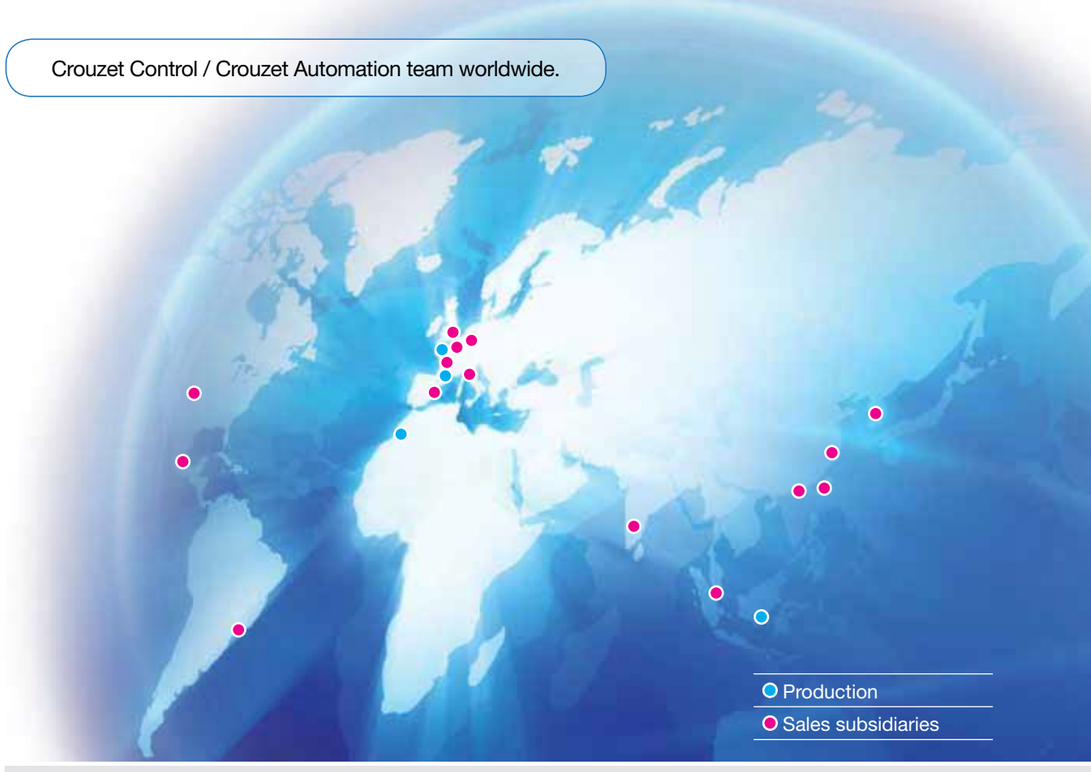
your trusted partner of choice to face industrial challenges of today and tomorrow

InnoVista Sensors™ is a worldwide industrial specialist of sensors, controllers and actuators for automated systems.

Through its brands, Crouzet Aerospace, Crouzet Automation, Crouzet Control, Crouzet Motors, Crouzet Switches and Systron Donner Inertial, InnoVista Sensors™ offers a wide range of reliable, efficient and customizable components dedicated to the Ae ospace & Defence, Transportation and Industrial market and segments.

Thanks to the recognized expertise of its teams and a strong innovation policy, InnoVista Sensors™ brings performance enhancing solutions to its customers worldwide.

Crouzet Control / Crouzet Automation team worldwide.



Expertise

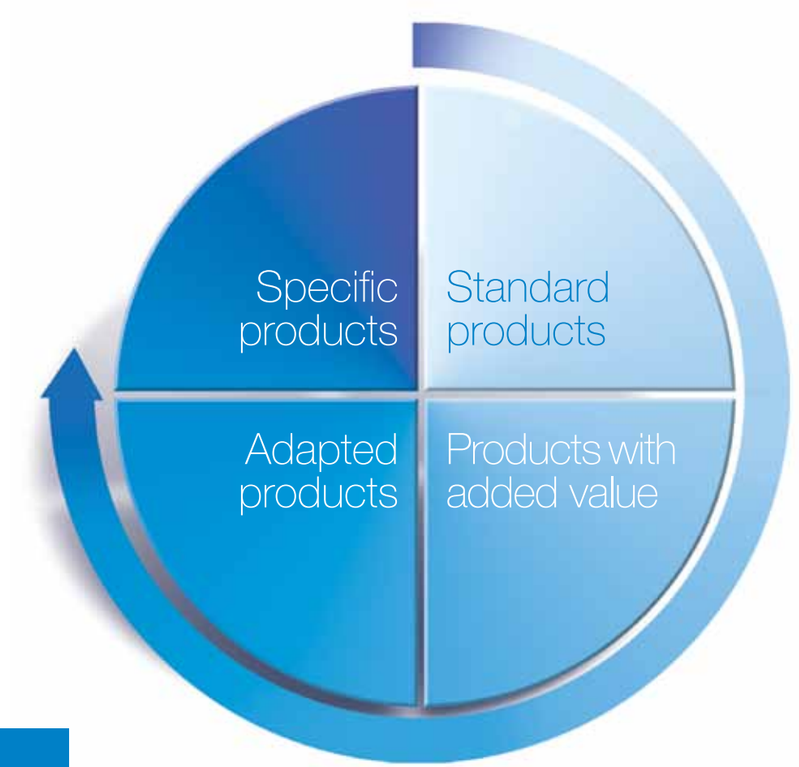
The Crouzet Control process

In addition to high-performance products, advice and support, Crouzet Control offers tailor-made solutions for any application.

Analysis of customer requirements

Expertise:

- UNDERSTANDING how applications work.
- INTEGRATING environmental constraints and quality requirements.
- PROPOSING technical and economic solutions which fully meet the needs of customers.



A multi-skilled team

- Application-based marketing
- Electronic and software design
- Prototyping
- Mechanical engineering
- Production
- EMC tests and approvals
- Sales and logistics follow-up

Production

Expertise:

- MEETING all needs, standard or specific, small-scale or mas production, thanks to the industrial flexibility of C ouzet's factories.
- GUARANTEEING the quality and reliability of products: all Crouzet's production sites are certified ISO 9001 and ISO 14001 and use quality tools such as 6 SIGMA.
- INTEGRATING eco-design into manufacturing processes to MINIMIZE the environmental impact of products throughout their life cycle.

Customer Adaptation Centre and Design Offic

Expertise:

- CAPITALISING on the expertise of Crouzet engineers in mechanical, electrical and electronic engineering, software engineering and networks.
- ADAPTING products to ensure innovation and differentiation.
- DEVELOPING AND INDUSTRIALIZING custom products.

Logistics and After-Sales Service

Expertise:

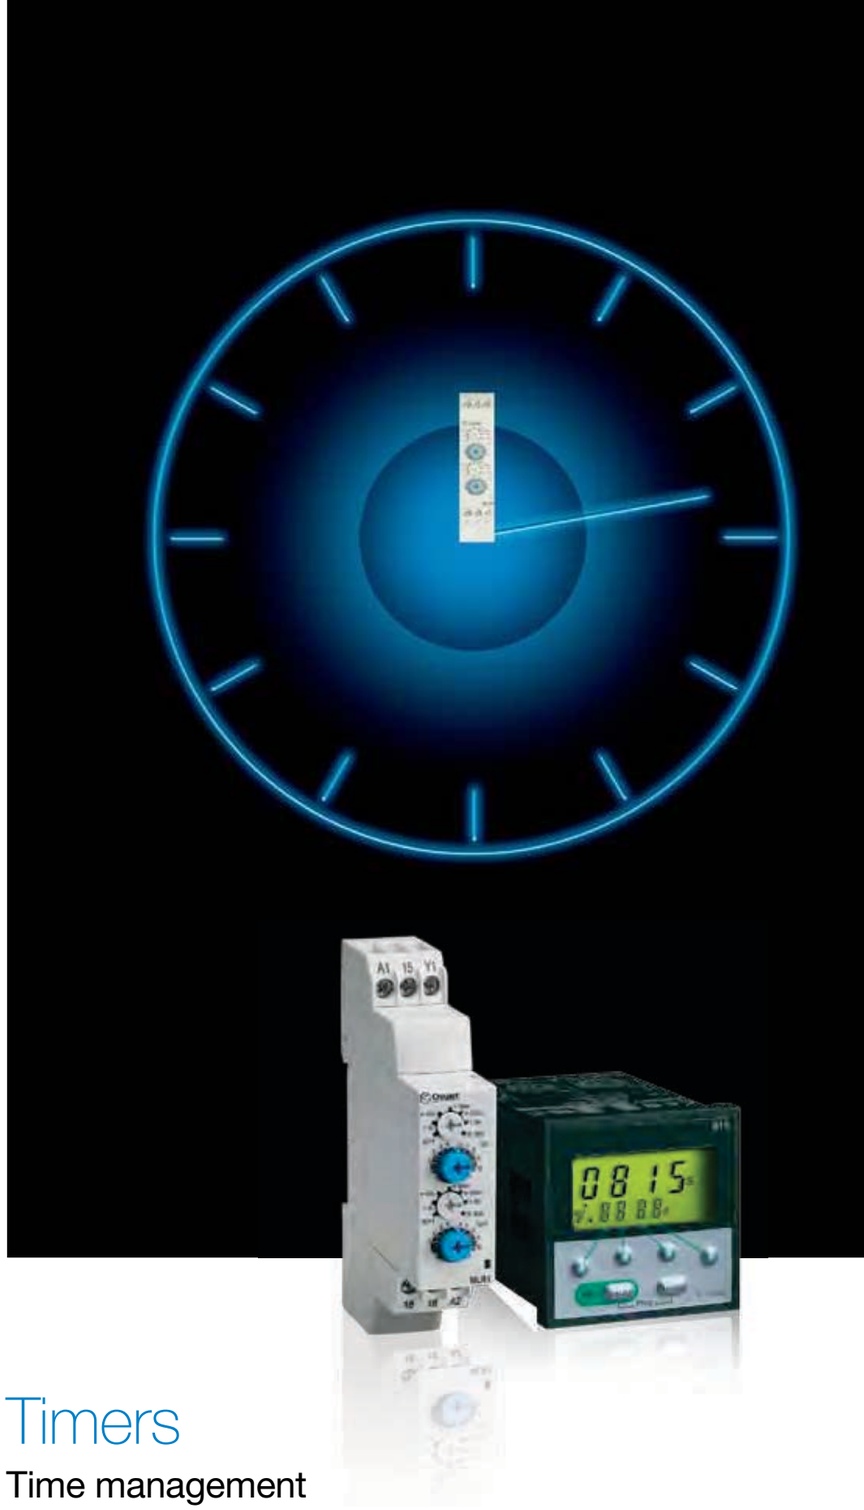
- PROVIDING an optimum level of service and GUARANTEEING a prompt delivery schedule, whatever the type of order: small-scale or mass production, standard or adapted products.
- TRACKING all orders in real time on www.crouzet.com

Crouzet Control

Behind every project, technologies and expertise

- **Local** support for all industrial projects.
- A **multi-skilled team**.
- A sales presence in over **40 countries**.
- A Premium offer designed to ensure **the excellence** of products and services.
- **Eco-design integrated** in Crouzet's "Offer Creation Process".
- Certifications: **ISO 9001, ISO 14001, OHSAS 18001**.
- Products which **comply with international standards** (UL, CSA, EC).
- A **dynamic R&D department**.

In addition to this catalogue, the **www.crouzet.com** website offers the latest tools, available as free downloads, including, technical data sheets and installation manuals for each product.



Timers

Time management

A timer
How can it be defined in simple terms

A timer is a simple automation component which is used to manage actions over a period of time or control how long actions last.The timer is a control device which triggers an action according to a time and a function. After a predefined time has elapsed, the timer closes or opens one or more contacts.
Timing cycles, whether single shot or repetitive, are started by latching inputs or pulsed inputs, allowing a wide variety of functions to be created.

A timer
To execute which actions?

Triggering, Actuating

A timer can be used to **trigger** an action according to a predefined time. It can also be used to stagger **actions** over a period of time.

Delaying, Flashing

In any time-related application, the timer can play a role and can be used to:
- Run installations according to times that can be adjusted by the user.
- Calibrate a machine running time.
- Allow or prevent an action.
- **Delay** an action.
- Manage stopping/starting of a motor, pump, etc. (star delta).
- Make an LED **flas** .

Triggering

Actuating

Delaying

Flashing

In addition to this catalogue, the **www.crouzet.com** website offers technical data sheets and installation manuals for each product, available as free downloads.

Crouzet Control, timers
A panel mounted range and a DIN rail mounted range

815 timer

MLR1

Crouzet Control, timers
Their features:

- Available in **mono** or **multifunction** versions (analogue or digital, with or without memory), to meet the specific needs of each application.
- **A timing range** of up to 9,999 hrs to cope with prolonged processing operations.
- A **range of supply voltages** from 12 to 240 V in one unit for optimised stocks.
- Recognised **quality** and **reliability** ensures the correct operation of equipment.

Crouzet Control, timers

Where are they found?

In electrical cabinets associated with other automation functions for the following markets:

- Food industry
- Industrial automation systems
- Lighting
- Building equipment
- HVAC
- Small or large industrial machines

Packaging

Controlling heat sealing times on blister packs, packaging bags, etc.

TIMER
MUR1, MXR1, MAR1

Illuminated signs

Managing flashing on illuminated signs.

TIMER
MLR

Fan

Time management for delayed fan start-up.

TIMER
(TMR48, TIMER 81X)

Dosage

Time management for distribution of glue, varnish ...

TIMER
MBR1

Ice maker

Managing the duration of refrigeration.

TIMER
TUR1, MUR1, MAR

Drink vending machine

Timed management of delivery of drinks.

TIMER
TMR48, TIMER 81X

Lighting for mobile homes

Managing the duration of outdoor lighting of a mobile home if the light switch is left switched on.

TIMED IMPULSE RELAy
MXR

Machine tools

Control of maintenance periods.

TIMER
TMR48, TIMER 81X

Sensing on assembly line

Managing the operation of a conveyor belt based on the time interval between products on the belt.

TIMER
MCR1

Remote machinery

Managing maintenance of the power supply in the event of a mains power failure, switching on an external backup power source for a given time.

TIMER
TK2R1

Chronos 2 DIN rail mounted, Timers

DIN rail modular casings

The timer accessories guide is available on the product data sheets which can be downloaded from the website www.crouzet.com

Function diagrams

Generic functions

U : Supply
R : Output relay or load
T : Timing
∞ : Infinit
C (y 1) : Command

• A function: Delay on energisation

1 relay

Single shot timing which starts on energisation.

• Ac function: Timing after closing and opening of control contact

1 relay

After energisation, closing of the control contact results in starting of the time delay T.
Output relay "R" (or the load) changes state at the end of this time delay. After opening of contact C (Y1), relay "R" drops out after a second time delay T.

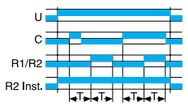
• Ad function: Delay on energisation (cannot be reset)

1 relay

After energisation, a control pulse or latching contact starts timing. At the end of timing, the output is excited. The output will be reset when a new control pulse or latching contact occurs.

• Ah function: Single shot flip-flo (cannot be reset)

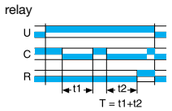
2 timers or
2 relays including
1 instantaneous



After energisation, a control pulse or latching contact starts timing. At the end of timing, the output is excited. The time delay is then reset. At the end of this new time delay, the output reverts to its initial value.

• At function: Timing on energisation with memory

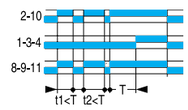
1 relay



Adds up the opening time of a contact.

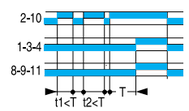
Output relay "R" (or the load) changes state at the end of timing.

• A1 function: Delay on energisation



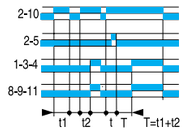
1 timer
1 instantaneous relay

• A2 function: Delay on energisation



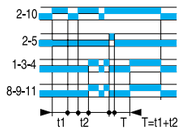
2 timers.

• AM function: Delay on energisation



Latching during the time delay.

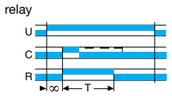
• AMt function: Delay on energisation



Latching during and after the time delay.

• B function: Timing on impulse (one shot) - Shaping (cannot be reset)

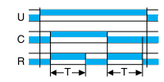
1 relay



After energisation, an impulse (≥ 50 ms) or a latching contact causes a change in state of the output relay "R" (or the load) which drops out at the end of timing.

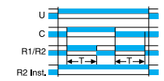
• Bw function: Pulse output (adjustable)

1 relay



On closing and opening of the control contact C (Y1), the output relay "R" (or the load) changes state for as long as the time delay lasts.

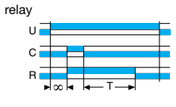
2 timers or
2 relays including 1 instantaneous



• C function: Timing after impulse True delay off

(without auxiliary power supply)

1 relay

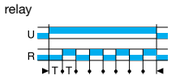


After energisation, closing of the control contact C (Y1) results in the change of state of output relay "R" (or the load).
Timing will only start when this contact opens.

• D or Di functions: Symmetrical flashin

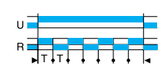
Repetitive cycle which alternately sets the output relay "R" (or the load) to operating and rest position for equal periods of time.

1 relay



D function:
The cycle starts with relay "R" in rest position.

1 relay

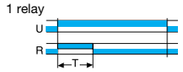


Di function:
The cycle starts with relay "R" in operating position.

U : Supply
R : Output relay or load
T : Timing
∞ : Infinit
C (y 1) : Command

• H function: Timing on energisation - Pulse output (adjustable)

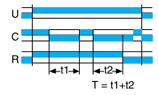
1 relay



On energisation, the output relay "R" (or the load) changes state, and stays there for the whole duration of the time delay and drops out at the end of the single shot cycle.

• Ht function: Delay on energisation with memory

1 relay

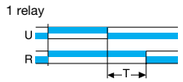


Adds up the total opening time of a contact.
On energisation, the output relay "R" (or the load) changes state, and stays there for the whole duration of the time delay and drops out at the end of the single shot cycle.

• K function: Delay on de-energisation True delay off

(without auxiliary power supply)

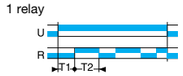
1 relay



On energisation, the output relay "R" (or the load) changes state.
On de-energisation timing starts and the relay "R" will only drop out at the end of this time delay.

• L function: Asymmetrical flashin

1 relay



Repetitive cycle with two times which can be set independently. Each time delay alternates with a different state of the output relay "R" (or the load).

2 timers or
2 relays including
1 instantaneous

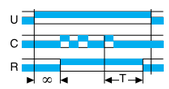
Note: The cycle starts with the relay "R"in the rest position.

• Li function: Asymmetrical flashin

1 relay

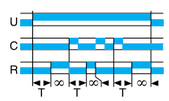
Repetitive cycle with two times which can be set independently.

• N function: "Safe-guard"



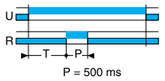
On the first cont ol pulse, the output is excited.
If the interval between two impulses is longer than the timing value, this occurs normally and the output relay "R" (or the load) will change state at the end of timing. Otherwise, relay "R" stays in its original state until the condition is fulfilled

• O function: "Delayed safe-guard"

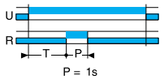


On energisation, a first timer runs and the output relay "R" (or the load) changes state.
On the appearance of a control pulse, relay "R" returns to its initial position and stays there as long as the time interval between 2 impulses is less than the timing value. Otherwise, relay "R" will change state at the end of timing.

• P and Pe functions: Impulse counter (delay on)

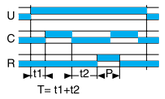


P function:
Timing starts on energisation.
At the end of timing, the output relay "R" (or the load) changes state for approximately 500 ms.



Pe function:
On energisation.
At the end of timing, the output relay "R" (or the load) changes state for approximately 1 s.

• Pt function: Impulse counter (delay on)

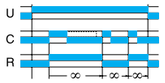


Adds up the total opening time of a contact.
At the end of timing, the output is excited for approximately 500 ms.

• Q function: "Star-delta" starting

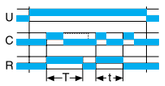
On energisation, the "star" contact closes instantaneously and timing starts.
At the end of timing the Ti "star" contact opens. After a pause of 40 to 100 ms the "delta" contact closes.

• TL function: Impulse relay



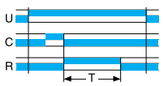
After energisation, a control pulse or latching contact closes the relay. A second control pulse opens the relay.

• Tt function: Timed impulse relay



After energisation, a control pulse or latching contact closes the relay and starts timing.
The relay opens at the end of timing or on a second control pulse.

• W function: Timing after pulse on control contact



After energisation, opening of the control contact results in a change in the state of output "R" (or the load) and timing starting.

• A2 function: Delay on energisation

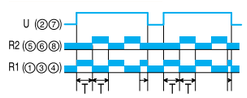
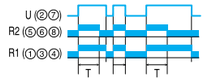
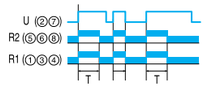
• D-Di function: Symmetrical flashin



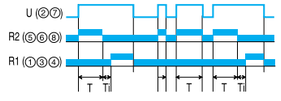
• H1 function: Timing on energisation



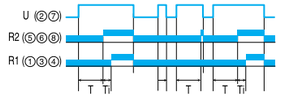
• H2 function: Timing on energisation



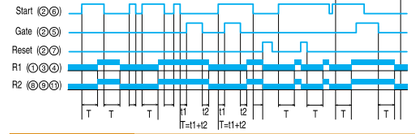
• Q1 function: Star-delta "starting"



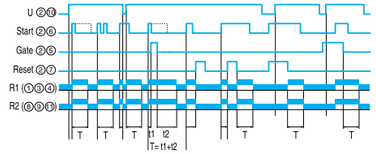
• Q2 function: "Star-delta 2" starting



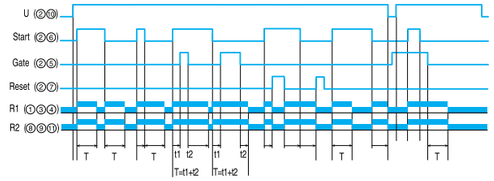
• Ac function: Timing after closing and opening of control contact



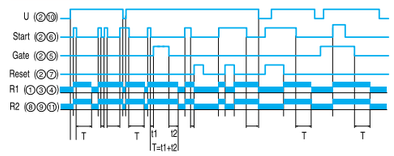
• B function: Timing on impulse (one shot)



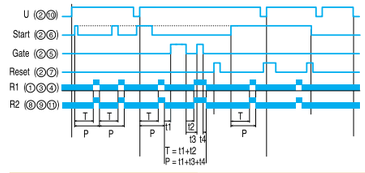
• Bw function: Pulse output (adjustable)



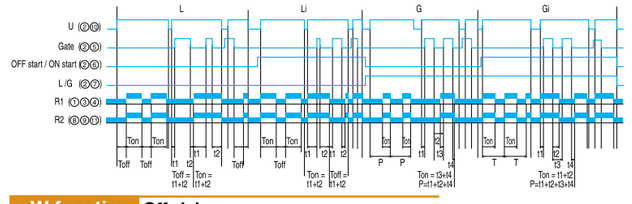
• C function: Off-delay



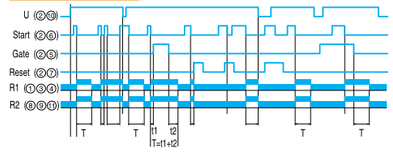
• G function: Cyclical function



• L/LiG/Gi function: Cyclical flashing timer



• W function: Off-delay

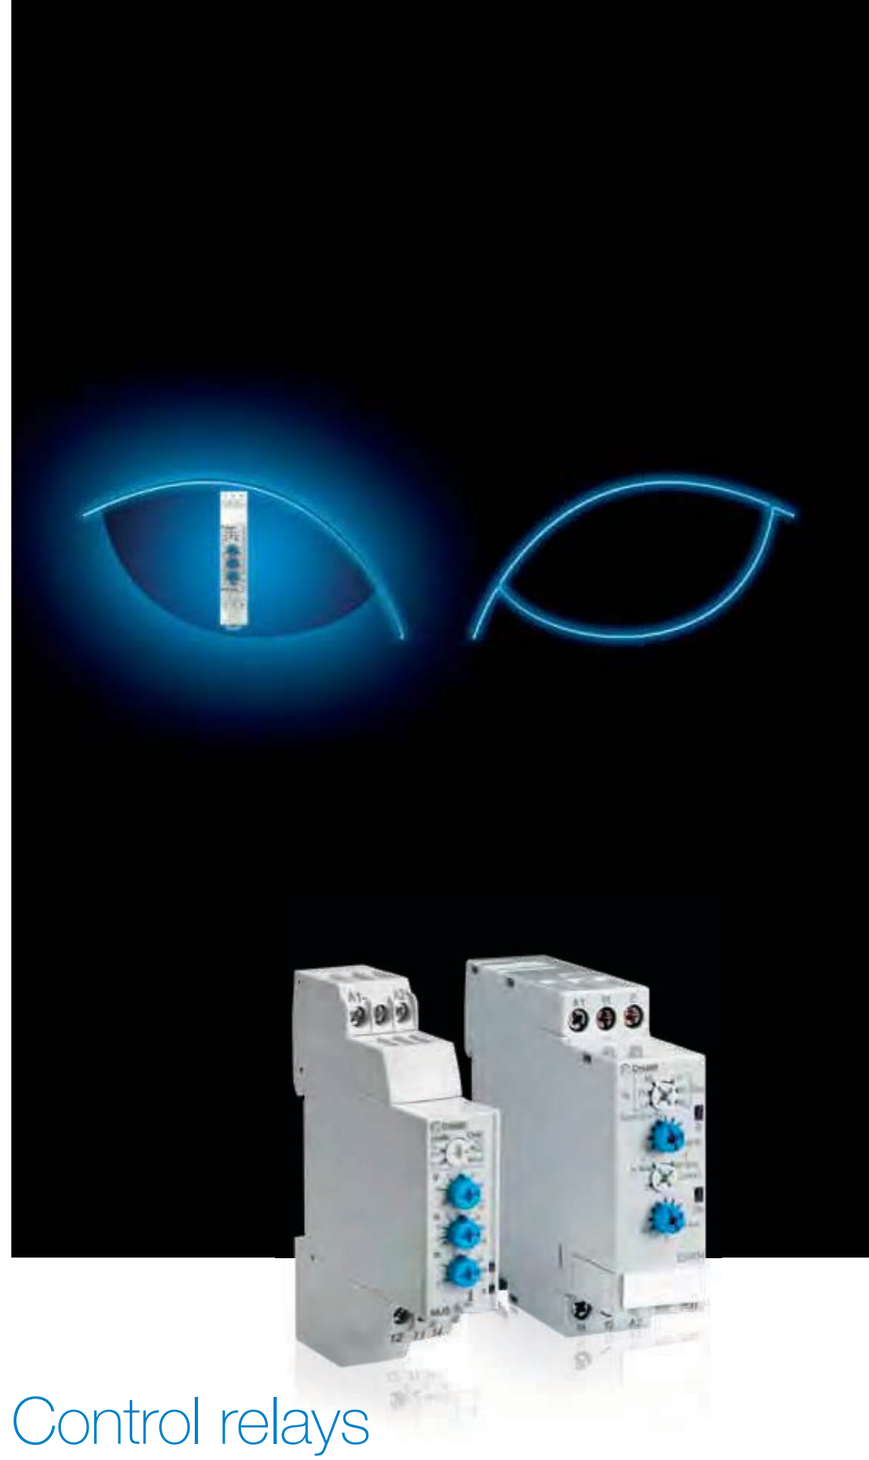


Crouzet Control

Behind every project, technologies and expertise

- **Local** support for all industrial projects.
- A **multi-skilled team**.
- A sales presence in over **40 countries**.
- A Premium offer designed to ensure **the excellence** of products and services.
- **Eco-design integrated** in Crouzet's "Offer Creation Process".
- Certifications: **ISO 9001, ISO 14001, OHSAS 18001**.
- Products which **comply with international standards** (UL, CSA, EC).
- A **dynamic R&D department**.

In addition to this catalogue, the **www.crouzet.com** website offers the latest tools, available as free downloads, including technical data sheets and installation manuals for each product.



Control relays

Instinctive control

A control relay
How can it be defined in simple terms

The control relay is an electronic device which can be used to detect and monitor physical values or electrical values.
If a device is found to be operating abnormally, the control relay trips to halt its operation.

A control relay
To execute which actions?

Protecting, Monitoring

The control relay is used to **protect** machines by monitoring values such as current, voltage, phase presence and sequence, levels, etc.

The control relay ensures total availability of equipment, a major challenge for industries keen to improve their productivity and operating profits

It is one of the indispensable **monitoring** components for ensuring continuity of service of each installation.

Sensing, Alerting

If a fault is **detected**, the machine is not allowed to run and the user is informed of the anomaly by a visual signal.

Thus **alerted,** the user can then correct any malfunctions. This avoids expensive breakdowns, synonymous with production delays and loss of profitabilit .

Controlling, Triggering

In level **control**, the control relay takes on a different role: it controls the pump in order to manage the level of water in a container (tank, swimming pool, sink, etc). Directly interfacing with probes, it **triggers** a signal and thus safeguards against machine breakdowns due to threshold adjustment.

Protection

Monitoring

Sensing

Alerting

Controlling

Triggering

In addition to this catalog, the **www.crouzet.com** website offers technical data sheets and installation manuals for each product, available as free downloads.

Crouzet Control, control relays
C-Lynx modular housing and E, F, L industrial housing

MUS (C-Lynx)

ENRM (E, F, L)

Crouzet Control, control relays
Their features:

- **Positive logic output** to protect installations in the event of a power failure.
- **True RMS** guaranteed regardless of interference on the electrical supply.
- Better integration in industrial and commercial cabinets thanks to **modular casings and industrial casings.**
- Simplifi d installation thanks to a **power supply** for single-phase products and a **self-powered** version for three-phase products.
- The **combination of a number of control functions** in one unit **optimises** wiring time and simplifies installation.
- A range of power supplies from 24 to 240 V in one unit **for optimised stocks.**

Crouzet Control, control relays

Where are they found?

In electrical cabinets associated with other automation functions for the following markets:

- Food industry
- Industrial automation systems
- Quarries
- Building equipment
- Water treatment
- Transport

Lift

Monitoring the internal temperature of the PTC probe. For lift machine rooms, monitoring the temperature between 4° and 40°C according to standard EN81.

C-Ly NX THERMOCONTROL RELAy S FOR LIFTS
HWT81

Ice maker

Fluid management: cold management compressor current control.

CURRENT CONTROL RELAy
MUS

Cranes

Monitoring overcurrent in the event of motor overload. When too high an overload occurs, the current exceeds the fixed th eshold and the relay contact closes.

CURRENT CONTROL RELAy
MIC

Pump management

Protecting the pump: detection of no-load operation by undercurrent control, detection of jamming by overcurrent control.

CURRENT CONTROL RELAy
HIH

Generating set

Frequency control in generating sets or detection of backup units.

C-Ly NX CONTROL RELAy (UNDeRf ReQUeNCy/ Ove Rf ReQUeNCy)
HHZ

Fountains

Maintaining an adequate water level for the pumps or water jet to work properly, preventing no-load operation (which often irreparably damages the pumps, and always stops the water jet effect).

CONTROL RELAy
HNM

Motors

Control of mains voltage (prevents overheating, destruction of insulation and change of direction). Motor protection, detection of anomalies (temperature too high, motor stopping).

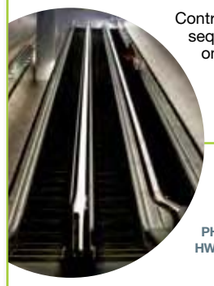
MOTOR TEMPERATURE CONTROL RELAy
HWTM

Crushers

Detection of obstruction or jamming.

CURRENT CONTROL RELAy
HIH

Escalators



Control/detection of phase sequence and failure on motors.

PHASE CONTROL RELAy
HWUA

Steam systems

Level control (maintaining a constant level).

LEv EL CONTROL RELAy S
ENRM

C-Lynx modular housing, Control relays

Phase control (3-phase supply)

Phase failure

A counter, a ratemeter
How can they be defined in simple terms

A counter can be used to count a number of actions or events.
It thus participates in production management and preventive maintenance.
A ratemeter can be used to display the speed of rotation of a motor in real time.

A counter, a ratemeter
To execute which actions?

Up counting, Down counting

For **up counting** or **down counting** a number of parts, events, a running time, the counter is the ideal solution. There are different types of counter with the following functions: up/down counter, batch counter, ratemeter, chronometer, multi-totalizer, elapsed time counter, impulse counter.

Informing, Displaying

A counter can allow a user to be **informed** and to **display** data and quantities easily. The data displayed can be read directly on the front panel.

Triggering, Actuating

A counter can be used to **trigger** an action or an intervention on a machine. The outputs **actuate** directly and/or transmit data to the control system.

Measuring, Chronometer timing

A counter can be used to schedule preventive maintenance. The machine running time is **measured** and the duration of an action **timed with a chronometer**.

Up counting

Down counting

Informing

Displaying

Triggering

Actuating

Measuring

Chronometer timing

In addition to this catalogue, the **www.crouzet.com** website offers technical data sheets and installation manuals for each product, available as free downloads.

Crouzet Control, counters and ratemeters
A digital range and an electromechanical range

CTR48

CEM48

Crouzet Control, counters and ratemeters
Their features:

- For fast count applications, a high-speed counting frequency: up to **50 kHz**.
- A **two-colour or backlit LCD dual display** for ease of reading.
- Considerable space saving due to **dual-function** electromechanical and electronic ranges.
- A **complete** output operating **logic** to cover complex applications.
- **Easier maintenance** thanks to removable connectors (CTR48).
- An enhanced **multifunction** electronic range **for optimised stocks.**

Crouzet Control, counters and ratemeters

Where are they found?

In electrical cabinets associated with other automation functions for the following markets:

- Industrial automation systems
- Building equipment
- Industrial machines
- Medical

Compressors

Counting operating hours and counting the number of starts.

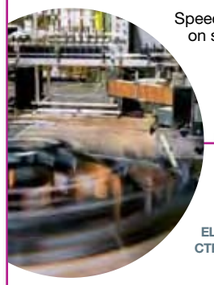
ELECTROMECHANICAL HOUR AND IMPULSE COUNTER
CMM48

Dehumidifier

Counting operating hours, energy consumption.

ELECTROMECHANICAL HOUR AND eNeRGy COUNTER
CEM48

Tachometer systems



Speed measurement and control on shrink wrapping machine.

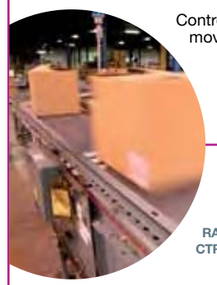
ELECTRONIC COUNTER
CTR24L 2511

Counting quantities

Managing quantities - Packaging by unit, batch or series of batches.

ELECTRONIC COUNTER
CTR48

Assembly line speed



Control of conveyor movement speed.

RATEMETER
CTR24L 2511

Milling machine

Combined ratemeter and counter for controlling the position and speed of a router.

ELECTRONIC RATEMETER AND COUNTERS
CTR24L 2513

Length measurement

Calculation of cut length on wood and paper machines.

ELECTRONIC COUNTER
CTR48

Position control

Managing quantities - Calculation of distance of travel.

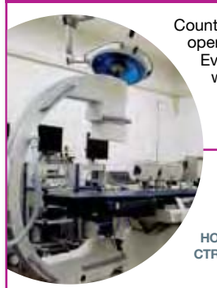
ELECTRONIC COUNTER
CTR48

Lifts

Combined impulse and hour counters - Maintenance. Start counters and operating time counters.

ELECTRONIC COUNTER
CTR24L 2514

Uv lamp



Counting and display of operating times. Event management, wear control.

HOUR COUNTER
CTR24 2323

Electronic counters

24 x 48 multifunction counters without preselection

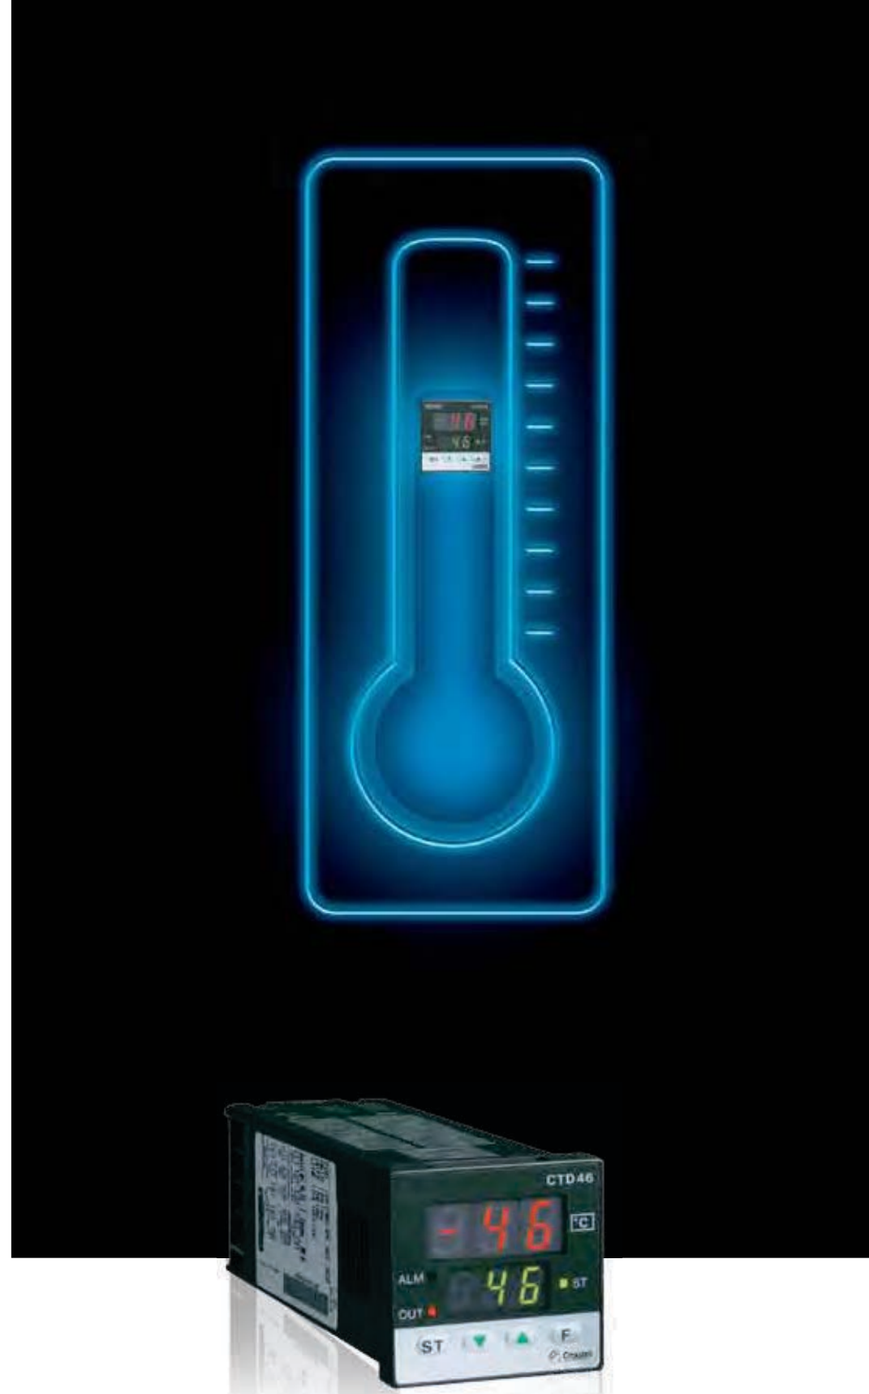
Crouzet Control

Behind every project, technologies and expertise

- **Local** support for all industrial projects.
- A **multi-skilled team**.
- A sales presence in over **40 countries**.
- A Premium offer designed to ensure **the excellence** of products and services.
- **Eco-design integrated** in Crouzet's "Offer Creation Process".
- Certifications: **ISO 9001, ISO 14001, OHSAS 18001**.
- Products which **comply with international standards** (UL, CSA, EC).
- A **dynamic R&D department**.

In addition to this catalogue, the **www.crouzet.com** website offers the latest tools, available as free downloads, including technical data sheets and installation manuals for each product.



Temperature controllers

A degree of constancy

A temperature controller
How can it be defined in simple terms

A temperature controller is an electronic device which is used to monitor and ensure a constant temperature according to a setpoint.

A temperature controller
To execute which actions?

Measuring

The temperature controller is used to **measure** and maintain the temperature of a room, an enclosure, a liquid.

It guarantees a constant temperature and ensures optimum use of the systems in which it is found: ovens, baths, cold rooms, machines.

Controlling, Displaying, Alerting

Directly interfacing with probes, the temperature controller **controls** and **displays** the temperature of the enclosure.

It can be used to set an **alert** in the event of an anomaly (low and/or high temperature).

Monitoring

The temperature controller action is not limited to **monitoring**. It senses and controls the temperature, acting on the system heating or cooling.

If the controlled temperature does not conform to the setpoint, the controller **implements** a heating or cooling action.

Measuring

Controlling

Displaying

Alerting

Monitoring

In addition to this catalogue, the **www.crouzet.com** website offers technical data sheets and installation manuals for each product, available as free downloads.

Crouzet Control, temperature controllers
A complete range

CTD46

Crouzet Control, temperature controllers
Their features:

- **Adaptive tuning products** which manage their parameters independently: **PID**, temperature rise and inertia curve to simplify the installation.
- A **sophisticated** control **algorithm** to obtain a temperature as close as possible to the setpoint.
- A **dual display** makes it user-friendly and easy to use.
- Compatibility with all types of probe thanks to a **"Multi-technology probe input".**
- **Multiple outputs** (logic and/or relay) for optimum integration in **any** system.

Applications

Crouzet Control, temperature controllers
Where are they found?

In electrical cabinets associated with other automation functions for the following markets:

- Industrial automation systems
- Building equipment
- Food industry

Chocolate factory

Managing the temperature of the liquid chocolate before it is poured into a mould.

TEMPERATURE CONTROLLER
CTD43

Bain-Marie

Maintaining the temperature of a bain-marie during cooking.

TEMPERATURE CONTROLLER
CTD46

Packaging

Monitoring the heating temperature of the various packages.

TEMPERATURE CONTROLLER
MIC48

Fluid management

Maintaining the temperature of a ceramic oven.

TEMPERATURE CONTROLLER
CTD43

Oven

Managing the temperature of an oven with change of setpoint possible via MODBUS.

TEMPERATURE CONTROLLER
MIC48

Cold room

Maintaining a storage room at freezing temperature.

TEMPERATURE CONTROLLER
CTD46

Brewing

Managing cooling of fermentation tanks.

TEMPERATURE CONTROLLER
MIC48

Cooking

Control of industrial ovens.

TEMPERATURE CONTROLLER
CTD46

Air treatment plant

Maintaining forced air at the correct temperature.

TEMPERATURE CONTROLLER
MIC48

Spray booth

Temperature control for "paint curing" in the motor vehicle industry.

TEMPERATURE CONTROLLER
CTD46

Temperature controllers

48 x 48 digital

Description	Part number
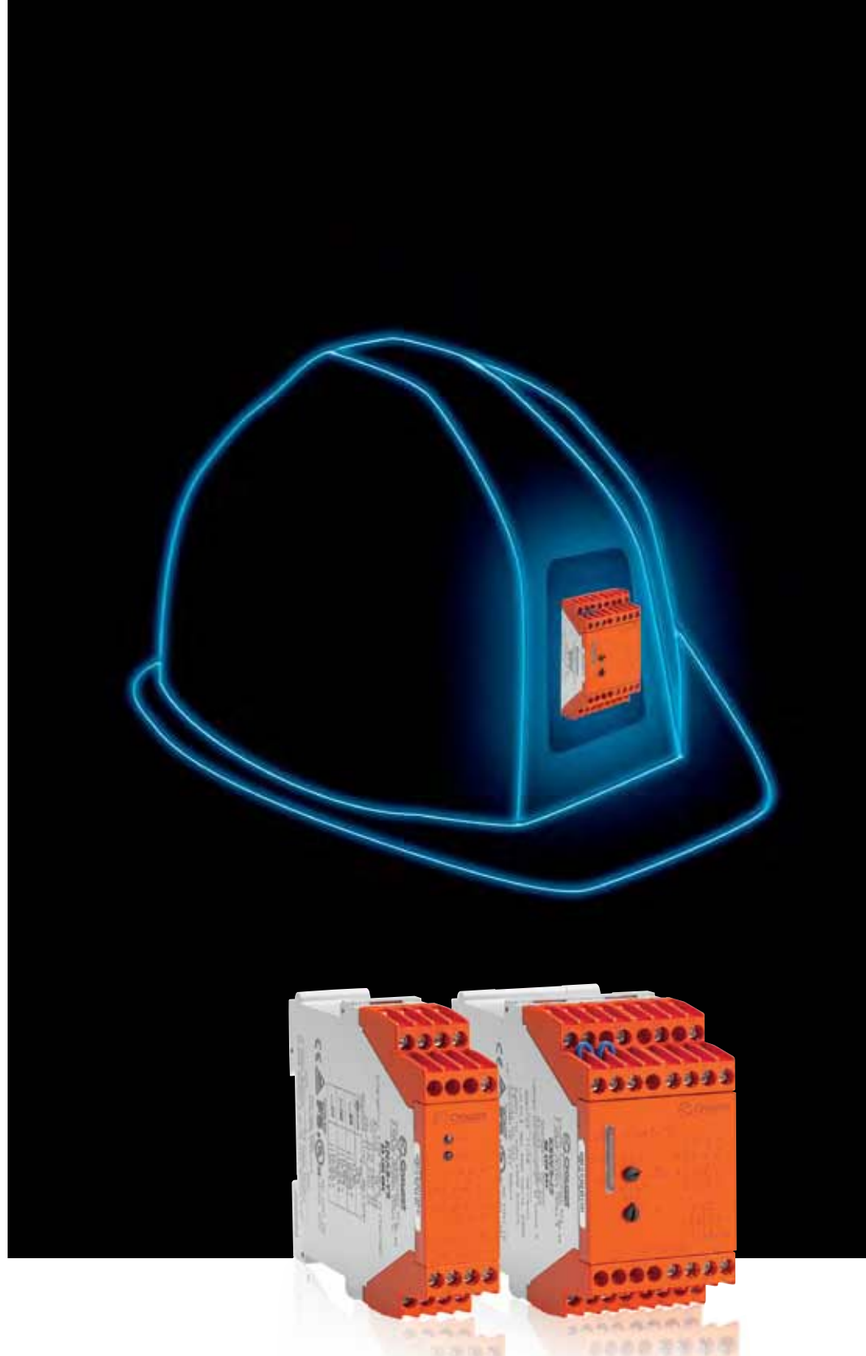
Thermocouple probe J with 316 stainless steel sheath - diameter 6 mm - max: 400°C	79 696 032
Thermocouple probe J with 316 stainless steel sheath - diameter 5 mm - max: 400°C	79 696 033
Thermocouple probe K with 304 stainless steel casing - max: 1100°C	79 696 034
Pt100 probe Class B with 316 stainless steel sheath - max: 200°C	79 696 035
Pt100 probe Class B with 316 stainless steel sheath - max: 400°C	79 696 036
Pt100 probe Class B with aluminium V6 sheath - max: 200°C	79 696 037

Crouzet Control

Behind every project, technologies and expertise

- **Local** support for all industrial projects.
- A **multi-skilled team**.
- A sales presence in over **40 countries**.
- A Premium offer designed to ensure **the excellence** of products and services.
- **Eco-design integrated** in Crouzet's "Offer Creation Process".
- Certifications: **ISO 9001, ISO 14001, OHSAS 18001**.
- Products which **comply with international standards** (UL, CSA, EC).
- A **dynamic R&D department**.

In addition to this catalogue, the **www.crouzet.com** website offers the latest tools, available as free downloads, including technical data sheets and installation manuals for each product.



Safety relays

User protection

A safety relay
How can it be defined in simple terms?

A safety relay is an automation component which is part of a machine's safety system, thus contributing to the safety of people around it.

It is essential for compliance with machine safety standards (EN ISO 13849-1 and IEC/EN 62061).

A safety relay
To execute which actions?

Protecting, Controlling
The safety relay **protects** people. It **controls** a user's action to ensure that this does not lead to anything that may damage his health, either voluntarily or accidentally.
Monitoring, Sensing
When a machine may be dangerous for the user, it is necessary to **monitor** all hazardous operations, and **detect** the slightest anomaly.
Actuating
It is then necessary to **actuate** safety contacts to stop cutting, rotating, burning items, etc which could be hazardous for the user.

Protecting

Controlling

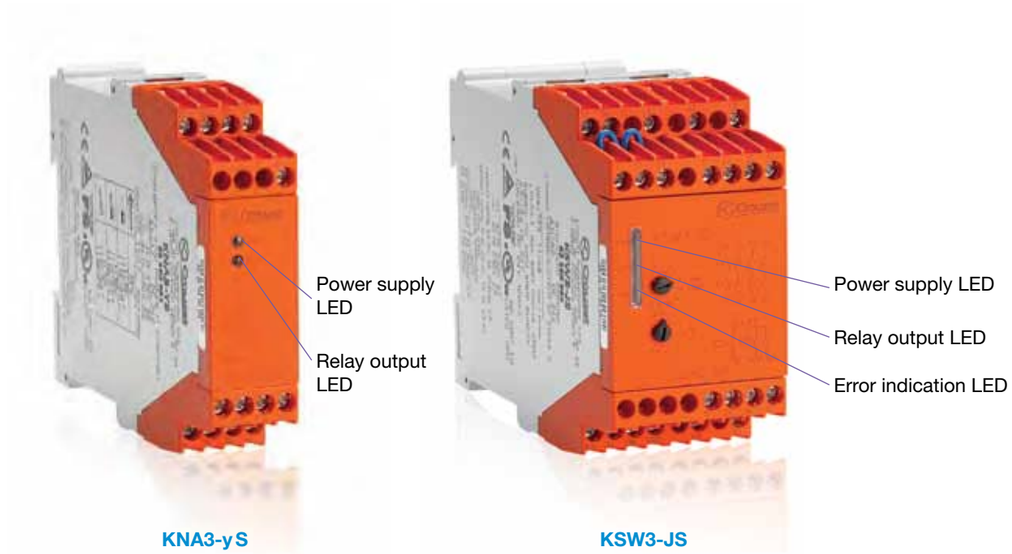
Monitoring

Sensing

Actuating

In addition to this catalogue, technical data sheets for each product are available as free downloads on the **www.crouzet.com** website.

Crouzet Control, safety relays
A relevelling range and a machine safety range



KNA3-yS KSW3-JS

Crouzet Control, safety relays
Their features:

- A range covering **machine applications**: emergency stop and mobile guard monitoring, emergency stop with timed contact, two-hand control, zero speed monitoring, expansion module and power supply accessory. A relevelling **control relay** for the lift market.
- A safety component with **one or two channels.**
- Prohibition of machine starting if a problem becomes apparent through **self-checking of the integrity of the control devices.**
- A range conforming to:
  - **Performance Level (PL) e** and **category 4** according to EN ISO 13849-1
  - **Limit value SIL 3 (SIL CL)** according to IEC/EN 62061

Crouzet Control, safety relays,

CROUZET
AUTOMATION

Logic controllers

Concentrated performance

Millenium 3 *Smart & Essential*

A logic controller
How can it be defined in simple terms?

A logic controller is a programmable module which is used to control small automation systems or small installations. It is an electronic device which combines all of Crouzet's historic expertise.

The logic controller is a **plural solution** in a control system since it contains solutions that can replace a number of products: timers, counters, control relays, temperature controllers, impulse relays, etc.

The logic controller operates as the **brain of applications**. It is capable of retrieving information and triggering actions; it can be adapted to suit the needs of customer applications.

A logic controller
To execute which actions?

Controlling

The logic controller **controls** and automates a set of actuators according to the state of the sensors, the passing of time and the program created using the M3 Soft software.

Measuring, Operator dialogue

The logic controller integrates a local screen, a true operator interface, where the user can view the **measured** values. The buttons on the front panel are configurable and can be used in programs. The M3 Soft software can be used to design an installation easily, test it using simulation mode and **communicate** with the application with monitoring mode.

Managing

The logic controller easily performs and **manages** complex control system sequences, by means of integrated functions.

Communicating, Triggering

The logic controller can be used to **communicate** remotely with PCs or mobile phones via SMS across a network.
It also incorporates a calendar to ensure the setting and **triggering** of actions.

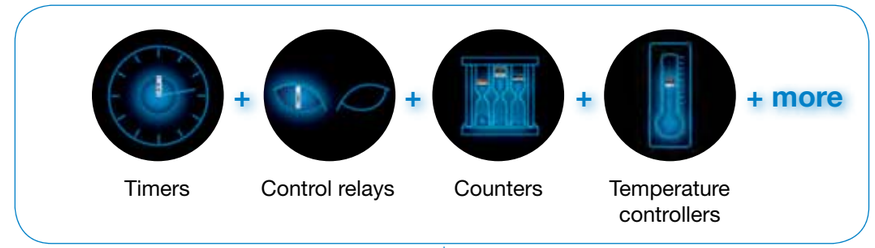
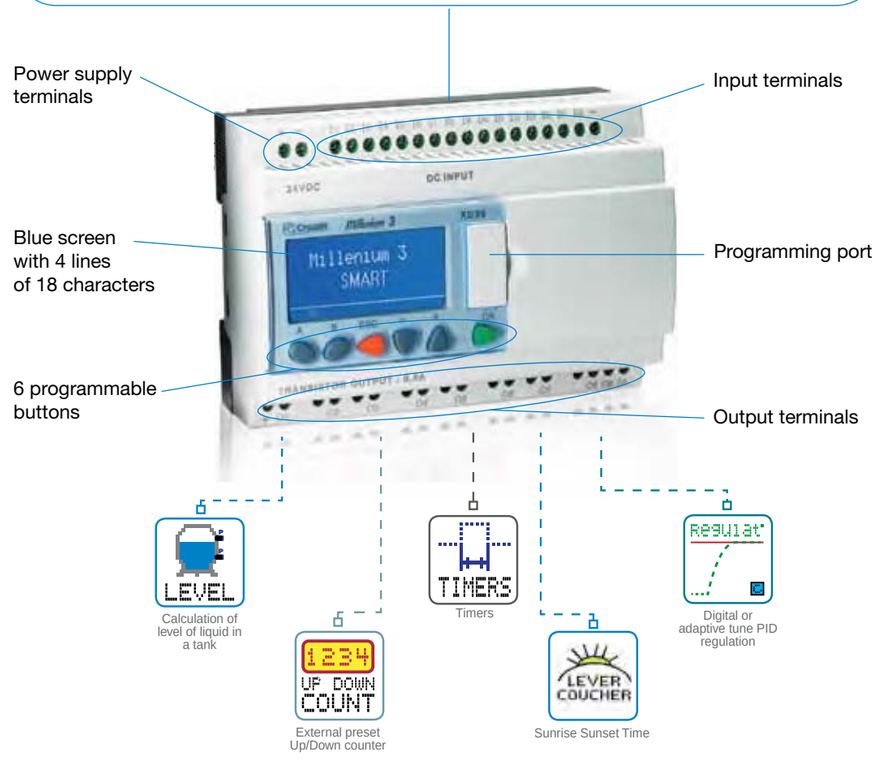
Communicating

Triggering

Crouzet Automation Logic Controllers
Millenium 3, concentrated performance

The **Millenium 3 Smart** logic controller is a programmable logic controller which enables the control and monitoring of machines or automation installations with up to 50 I/O.





To tackle simpler applications that still require a powerful logic controller, Crouzet Automation offers the Millenium 3 **"Essential"** range. The 12 VDC or 24 VDC Millenium 3 Essential range includes a variety of versions and is compatible with a large range of accessories. It is the right solution for simple needs.

Crouzet Automation Logic Controllers
The Millenium 3 Smart range

- **Multiple configuration option** derived from an extensive product range with numerous accessories
- **Simplified connectivity** making integration of communication systems easy
- **Easy implementation** supported by free, user-friendly programming software (M3 Soft)
- **Application-specific solutions** thanks to dedicated and easy to use specific function blocks
- **Enhanced visibility** on the display with high contrast, blue back lit LCD screen

Expandable versions

XD26 XB26

XD10 XB10

Expandable kit

Compact versions

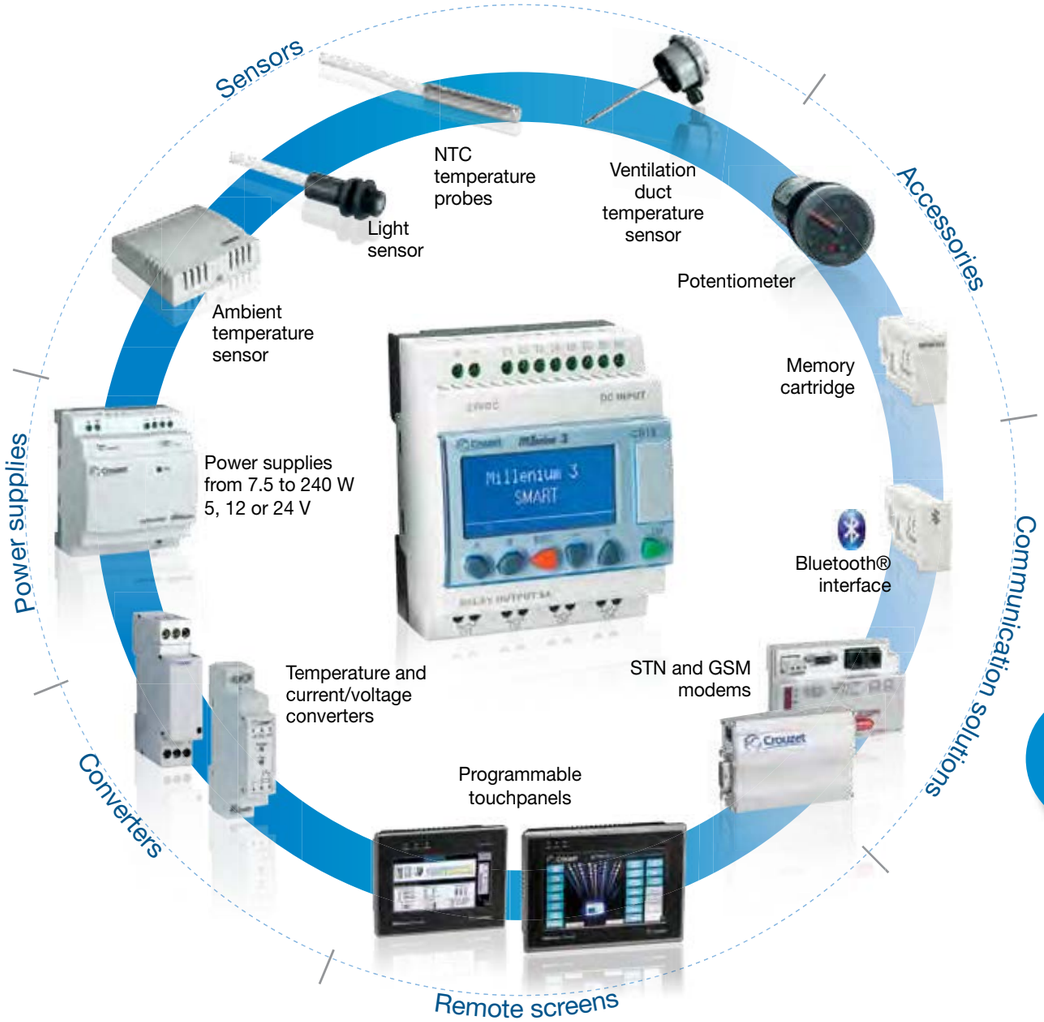
CD20 CB20

CD12 CB12

Compact kit

Crouzet Automation Logic Controllers
Accessories

Sensors, power supplies, converters, remote screens and communication accessories offer solutions to control your automation systems with the greatest ease of use.



Communication solutions

Crouzet Automation Logic Controllers
Extensive Connectivity Options

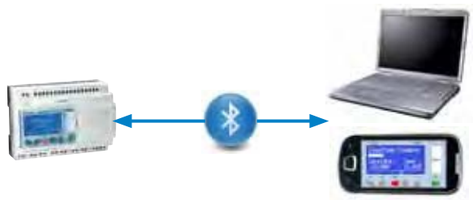
Solutions with close proximity to your installation

Millenium 3 Virtual Display - Bluetooth® or USB

Your requirements

- **viewing** setpoints on a panel less than 10 m away
- **Changing and modifying** setpoints
- **Locating the** Millenium 3 **display unit** remotely
- **Reading** counters in the vicinity

Our solution



Main functions

- **Remote viewing** of the Millenium 3 **display unit**
  - on an Android smartphone via Bluetooth®
  - on a PC via Bluetooth® or USB
- **Display/modificatio** of program setpoints
- Access to a **virtual panel** (Millenium 3 without display unit)

In summary

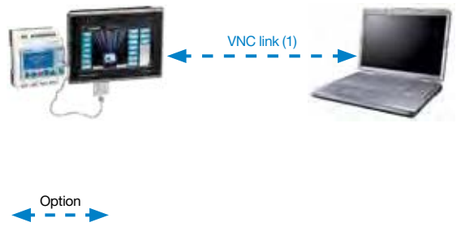
- **Bluetooth® interface** (10 m): Millenium 3 accessory
- Two versions: **Lite** (ESC/ENTER buttons disabled) & **Standard**

MTP programmable touch panels - RS232 cable

Your requirements

- **Displaying** data on a graphic panel
- **Modifying setpoints** from the touch panel
- **Taking control of the** remote panel from a distance

Our solution



Main functions

- **Supervision** of your installation
- **Use** of Millenium 3 internal data, processing alarms and recipes
- **Display** of text, data, graphics, animations
- **Archiving** of data
- **Customization** of interfaces (picture library)
- **Remote control** of panel

In summary

- **Storage**: 128 MB flash memory, SD card and USB key
- **Direct communication** using the Millenium 3 programming port
- **Programmable** with EB software (compatible with Windows 2000/XP/Vista/7)
- **Extensive connectivity**

(1) VNC: Virtual Network Computing. Allows a device to be controlled remotely.

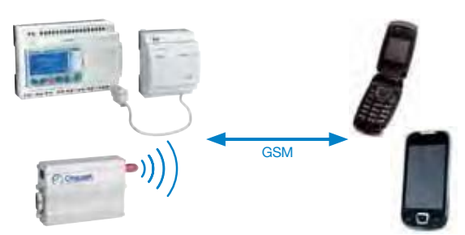
Wide Area Network (WAN) solutions

M3MOD - GSM modem communication interface

Your requirements

- Receiving **remote early warning** of an event
- **Consulting a value** or an internal state
- **Occasionally modifying** setpoints

Our solution



Main functions

- **Automatic notificatio** of alarms via SMS
- Input and output states, as well as all program values, **can be polled and controlled remotely**
- **Reports** can be produced using the available variables
- Management of **telephone contacts**

In summary

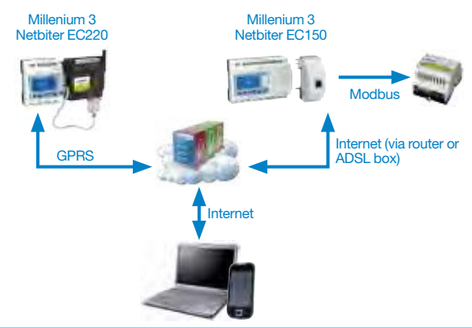
- Reliable **plug & play** solution that is simple to install
- Solution managed using **M3 Soft** software
- Option **to send SMS messages** via a telecom operator service

Remote management solutions with HMS(2) - Cloud

Your requirements

- **Supervising and monitoring** installations with up to 50 remote I/O
- Managing **an installed base of machines**
- Accessing your data remotely, **24/7**
- Optimizing your **maintenance operations**

Our solution



Main functions

- **Remote control** of an automated application
- **Display** of Millenium 3 program parameters and values **via the internet**
- **Remote** setpoint **modificatio**
- **Data logging**
- Management of **events** sent **via emails or SMS**

In summary

- **Direct communication** between Netbiter and Millenium 3 via the SLin/SLout protocol or via Modbus
- **GPRS**: SIM card procured via HMS
- **Cloud solution**: secure remote server
- **Easy** to set up and use
- **Several Millenium 3** can be connected via Modbus

(2) Partnership solutions with the HMS company, validated by Crouzet Automation and HMS. Information relating to the products has been provided by the supplier of each product respectively, and they are wholly responsible for its accuracy in addition to supplying and providing backup for their products.

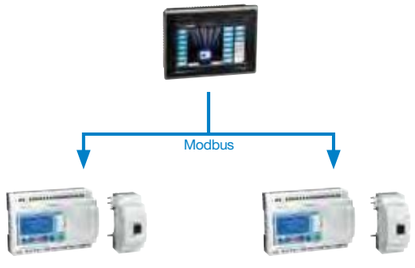
Local Area Network (LAN) solutions

Programmable touch panels and communication extensions – Modbus networks

Your requirements

- **Managing a group of machines** or an installation on a local area network
- **Centralizing** data
- **Displaying** data on a graphic panel
- **Modifying setpoints** from the panel
- Accessing the system locally **in real time**

Our solution



Main functions

- See MTP programmable touch panels solution
- **Management** and **centralizing** of data in a single place
- **Display** of Millenium 3 program values
- **Remote** setpoint **modificatio**

In summary

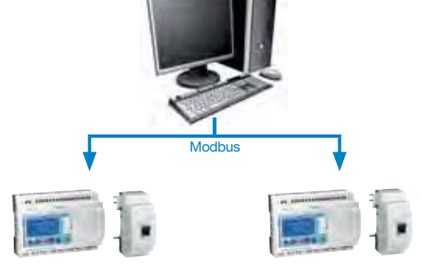
- MTP panel **Modbus master**
- XN05 extension: **Modbus ethernet TCP/iP**
- XN06 extension: **Modbus RS485 RTU**

Communication extensions - Modbus RS485 or Modbus Ethernet TCP/IP

Your requirements

- **Managing a group of machines** or an installation on a local area network
- **Centralizing** data
- Accessing the system locally **in real time**

Our solution



Main functions

- Can be **combined with distributed automation**
- Management and **centralizing of data** in a single place
- **Display** of Millenium 3 program values
- **Remote** setpoint **modificatio**

In summary

- Uses **Modbus protocol**
- XN05 extension: **Modbus ethernet TCP/iP**
- XN06 extension: **Modbus RS485 RTU**
- **Compatible** with standard supervisors

M3 Soft software

Crouzet Automation Logic Controllers

Millenium 3 and M3 Soft

The M3 Soft is a **high-performance** software platform used to program the Millenium 3 logic controller and **optimize** design times.

Free

The Millenium 3 programming software (M3 Soft) can be **downloaded free of charge** from the Crouzet website at **www.crouzet.com**

Blocks can be wired in wiring mode or text mode

Move one or more blocks without disconnecting the wires

Choice of programming language

Clear work area

Customized password protection

M3 Soft software

Its features

Simple

- **Quick, simple and intuitive programming** requires no specialist knowledge
- Self-teaching made easier thanks to a **user-friendly online help guide** and programming examples
- A **simulation mode** that **consistently represents** controller operation

Powerful

- A complete range of **basic functions**: counting, timing, comparison, display, logic, gain, sin/cos, etc are also available
- A wide range of **dedicated functions:** pump rotation, PID regulation, movement, pressure, level, water ratio, solar tracking, and flo

User-friendly and ergonomic

- Software available in **5 languages:** English, French, Italian, German and Spanish
- Function block **programming** is **fun** and **very visual**
- **Blocks simply organized** by function for quick access
- **Help** associated with each function block accessible **at the click of a button**
- Programming langages: **FBD** (Function Bloc Diagram) and **SFC** (Sequential Function Chart/ Grafcet) or **LD** (Ladder Diagram)

User-definable and effective

- Possibility of creating and saving **custom macros** in the macro tab allowing the user to simplify programs and utilize their expertise
- Possibility of protecting macros by locking them with a password for **greater security**

Function blocks

APPLICATION

Cam Bloc	Control of a group of 8 integral cam wheels.
Angular Cam Timer	Cam timer with the angle made by the cams as the command input.
Pumps management	Pumps Management (Tank Management with circular pump changeover).
Sunrise Sunset Time	Calculation of the sunrise and sunset time in relation to the latitude and longitude.
Solar Tracking one Axis	Calculation of the sun's position so that a sun dial can be placed.
Analog PID Regulation (8 bits)	Temperature control (pressure or other) with 8 bitsanalog output.
PWM PID Regulation (8 bits)	Temperature control (pressure or other) with 8 bitsdigital output.
Pressure Gain	Interface between a Pressure Sensor and the Millenium 3 logic controller.
Flow	Calculation of the flow of a liquid in a pipe using a differential pressure element or by measuring the dynamic pressure.
Level	Calculation of the level of a liquid with or without constant density, in an open or closed tank, using pressure sensors.
CTN 1	Temperature measurement It is dedicated to CTN1 (-25 to +85 °C).
CTN 2	Temperature measurement. It is designed for CTN2 type CTNs (-35°C to +120°C).
CTN 3	Temperature measurement. It is designed for CTN3 type CTNs (0°C to +200°C).
LUX-I	Light measurement It is designed for photoresistors and internal light meters.
Twilight	Calculation of the sunrise and sunset times and also the twilight times in relation to the latitude and longitude read on the function block inputs.
Solar Tracking Dual Axis	Calculation of the sun's position so that a sun dial can be placed. This positioning depends on the two angles calculated by the function: the elevation angle and the azimuth angle.
Swimming Pool Filtration	Filtration time information in relation to the water temperature.
Defrost	Defrost cycle management
Heat Curve	Modulation of the heating water temperature according to the atmospheric conditions. The function uses automatic regulation depending on the temperature outdoors called the temperature curve or "water ratio".
Analog PID Regulator (Auto-tuning)	Auto-tuning proportional-integral-derivative (PID) controller.

PROG

Constant On	Constant On
Constant Off	Constant Off
Yes Bit	Copy of the input to the output. (very helpful when macros are being used)
Numerical Constant	Integer with a value between -32768 and +32767.
Yes Num	Copy of the input to the output. (very helpful when macros are being used)
Memory	Saving of a value between -32768 and 32767.
Storage	Storage of data values with an average value.
Archive	Saving of two values simultaneously with the information relating to their time-stamping.
Random	Generation of a pseudo-random value between the min and max values set by the user.

CALCUL

Gain	Conversion of an analog value by changing the scale and offset.
Add/Subb	Simple operations on integers: Addition and/or Subtraction.
Mul/Div	Simple operations on integers: Multiplication and/or Division.
ADD/SUB 2 Inputs	The ADD-SUB (Addition or Subtraction) function is used to perform simple operations on integers.
Sin/Cos	Calculation of the cos and sin of an angle between 0° and 90°.
Square Root	Calculation of the square root of the number present as an input with accuracy to two decimal points.
Bit Multiplexer	Copy of the selected A or B input to the outputs Q and/Q.
Multiplexer A B	Multiplexing function on 2 analog values.
Demultiplexer	Demultiplexing of integers. Used to direct the value of the input to one of the 4 outputs.
Multiplexer	Multiplexing word inputs. Used to direct the value of one of the selected inputs to a predefined output.
Dec/Bin	Break down of an integer type input (16 bits) into 16 bit type outputs.
Bin/Dec	Make up of an integer type output (16 bits) from 16 bit type inputs.
SPLIT 16 bits to 4	Split of a 16-bit word into four 16-bit words with values between 0 and 15.
SPLIT 16 bits to 2	Split of a 16-bit word into two 16-bit words with values between 0 and 255.
Word Shift Register	Shifting of the 16-bit words on each rising edge of the clock.
Shift Register	Shifting of information by saving it to the memory (shifting of bits in a 16-bit word on each rising edge of the clock).
Transfer Function	Table of correspondence between the X input and the Y output.The table of correspondence is created from a csv file
Transfer Function 50 values	Table of correspondence between the X input and the Y output.The table of correspondence (50 rows max) is created from a sv file
Timer Transfer Function	Correspondence table for the Minutes operating time and the Y output.
Timer Transfer Function 50 values	Correspondence table for the Minutes operating time and the Y output. (50 Values)

PROG

Hour Minute	Indication of the time from the controller (hour and minutes).
Hr Mn Converter	Conversion of a time period in the "hour : minute" format to minutes and vice versa.
Controller Status	Access to the controller states and modify the behaviour of its FBD and/or SFC program depending on these states.
Summertime	Active function throughout summer time, and inactive throughout winter time.

MACROS

Display 15 texts	Display of 15 texts one after each other with 15 Displays Function Blocs
Scroll 4 lines	Scroll down of a text of four lines on the screen of the Controller
My Macro	Possibility to create a personal macro library and to store them in the Macro tab.

INPUTS/OUTPUTS

Discrete Input	**Integer Input**
Filtered Digital Input	**Discrete Output**
Analog Input 0..10V	**PWM Output**
Filtered Analog Input	**Analog Output Expansions 10 bits**
Analog Input Expansion 10 bits	**Integer Output**
Analog Input Expansion 12 bits	

HMI

Display	**B Button**
Text	**ESC Button**
Menu Scroll	**Minus Button**
LCD Backlight Output	**Plus Button**
A Button	**OK Button**

COMMUNICATION

SL In	Writing via serial link of data stored in the controller's fixed addresses
SL_In S (saved)	Data transmission via a programming port to memory space in the controller's fixed addresses. Data is protected in the event of disconnection of the controller
SL Out	Reading via programming port of data stored in the controller's fixed addresses.
Alarm	Control of 10 alarm levels and distribution of a serial data to a digital output, connected to a modem digital input. For example to send a SMS.
Message	distribution of alarm messages to mobile phones, to the Millenium 3 Alarm tool or to e-mail addresses via the M3MOD

GRAFCET SFC

Resettable Initial Step	When RESET function is activated, activation of the STEP OUTPUT for the function, which is the initial step, and reinitialization of all of the ther active steps.
Initial Step	Initial step of an SFC chart
Step	A step of an SFC chart.
Or Divergence Step	Transition of one step to be simultaneously made toward one or two steps.
Or Convergence	Transition of one to four step(s) to be simultaneously made toward one step.
And Divergence	Transition of one or two steps to be simultaneously made toward two steps.
And Convergence Step	Transition of two steps to be simultaneously made toward one step.
Wait SFC Step	Set up of a wait phase or step for a PLC or a device.
Move SFC Step	Set up of a move step for a motor controlled by the PLC to a position specified on the TARGET input.
Motor Multiplexer	Combination of the motor control signals produced by two linked MOVE SFC steps.

CONTROL

Timer	Large set of timer functions (A/C, BW, B/H,Li/L, Totalizer)
Schmitt Trigger	Monitoring of an analog value in relation to two thresholds.
Timer A	Delay of actions for a predefined time.
Bistable	Impulse relay function.
Set Reset	Bistable memory - Priority assigned to either SET or RESET.
Timer Set Reset	Trigger of operation of a particular device at a fixed time for a period set by the user.
One Second Clock	The blinking input function is active every second.
Compare in Zone	Comparison of a value between two setpoints (the MIN and MAX values determine the zone).
Compare	Comparison of two analog values using the =, >, <, >=, <=, =/= operators.
MULTI COMPARE	Activation of the output corresponding to the value present on the "Value" input.
HL Switch	Comparison of a value against 5 thresholds.
Min Max	Saving of the minimum and maximum values of a variable signal.
Reduced Average	Update of the configured average of a number of values by deleting the minimum and maximum values.
Time Prog	Daily, weekly, monthly and yearly time programmer.
Weekly Time Prog	Daily, weekly, monthly and yearly time programmer.
Preset Counter	Preset up/down counter
Up Down Counter	External preset up/down counter.
Preset H Meter	Preset hour counter (preselection of hour, minute).
High speed count	Counting of the pulses arriving at the inputs of a controller powered by a DC supply at rates in excess of one pulse every 6 ms.
Fast count	Counting of the pulses arriving at the input at rates in excess of one pulse every 10 ms.

LOGIC

Not		**Or 6 Inputs**	
And 2 Inputs		**Nand 4 Inputs**	
And 4 Inputs		**Nor 4 Inputs**	
And 6 Inputs		**Xor 2 Inputs**	
Or 2 Inputs		**Boolean 6 Inputs/2 Outputs**	
Or 4 Inputs		**Boolean**	

Function block marked in red:

CTN 1	Available only for the Millenium 3 Smart Range

Logic controllers

Applications

Crouzet Automation Logic Controllers

Where are they found?

Buidling Equipment

Access Control

Opening control for doors

Opening control for doors and other associated security devices for restricting access; synchronization between the various doors

BOOLEAN

BOOLEAN OR LOGIC
Create logic equations between the connected inputs

Automatic barriers

Control barriers with automatic detection of vehicles. Function for selecting opening times / days.

1234 PRESET COUNT

TIME PROG

UP/DOWN COUNTER
Up/Down counter with external preset

HVAC

Heat pump

Management of various parameters such as heating, cooling, flui temperatures, operation, calendar-based function, frost protection mode, alarm management, etc

TIME PROG

WATER RATIO
Water temperature control

CLOCK
Weekly and yearly time programmer

Air treatment plant

Maintaining forced air at the correct temperature

CTN1 °C

Regulat°

GAIN

NTC1
Temperature measurement

REGULATION
Analog PID regulation

GAIN
Conversion of an analog value by changing the scale and datum point

Building Automation

Solar water heating

Automation of operation and heating regulation, remote management of the installation

Regulat°

TEMPERATURE CONTROL
(pressure or other)

Illuminated signs

Managing flashing on illuminated signs

TIME PROG

LUX-I

WEEKLY TIME PROGRAMMER
Programming of time slots during which it will be possible to execute actions

LUX-I
Measurement of the light level

TWILIGHT
Calculation of the sunrise and sunset times

Infrastructure and Energy

Fluid management

Swimming pools, fountains, spas

Managing circulation pumps, monitoring levels, temperature and conductivity of the water

FILTRATION
Filtration duration settings depending on the water temperature

irrigation/Sprinklers

Irrigation control based on temperature, humidity, and day/night cycle

PUMP MANAGEMENT
Pump rotation function

Water treatment

Reverse osmosis

Circulation pumps management, supervision of flow p essure and temperature of osmosis processed water

CTN2 °C

FLOW
Calculation of the flow of a liquid i a pipe

CTN
Temperature measurement (-35 to +120 °C)

Pump management

Circulation pumps management, supervision of levels and pressure

GAIN

LEVEL

GAiN
Conversion of an analog value by changing the scale and datum point

LEvEL
Calculation of the level of liquid in a tank

Industrial OEMs

Packing machines

Stretch wrapping machines

Controlling the motor that unrolls the packing film. Cont ols cutting of the film after heat sealing and monitors the duration of the motor cycles

STEP

TIMERS

GRAFCET SFC FUNCTIONS
For sequential automation systems (Sequential Function Chart)

TIMERS (TEMPORISATEURS)
A/C function - BW function - B/H function - Li/L function

Packaging

Controlling heat sealing times on blister packs, packaging bags, etc

1234 H-SPEED COUNT

&

AND

HiGH SPee D COUNT
Counting of pulses

AND
Logical AND with 2 inputs

Other typical applications:
Medical, Solar, Agricultural Equipment, Transportation, Hoisting, Handling…

Selection guide

Millenium 3 range

Type		Part number	Supply	Inputs	Outputs	Available in 12 V ⎓	Available in 24 V ∿	Available with Solid State Output 0.5 A/PWM	Available in / compatible with the Essential version **
M3 Smart kits	**Kit 12 Smart***	**88 974 080**	24 V ⎓	8 (4 configurable as analog)	4 relays 8 A				
	Kit 12 Smart*	**88 974 081**	100 ⇨ 240 V ∿	8	4 relays 8 A				
	Kit 20 Smart*	**88 974 082**	24 V ⎓	12 (6 configurable as analog)	8 relays 8 A				
	Kit 20 Smart*	**88 974 083**	100 ⇨ 240 V ∿	12	8 relays 8 A				
	Kit 26 Smart*	**88 974 084**	24 V ⎓	16 (6 configurable as analog)	8 relays 8 A and 2 relays 5 A				
	Kit 26 Smart*	**88 974 085**	100 ⇨ 240 V ∿	16	8 relays 8 A and 2 relays 5 A				
Compact versions									
With display	**CD12 Smart***	**88 974 041**	24 V ⎓	8 (4 configurable as analog)	4 relays 8 A	•		•	•

	NB20	**88 970 013**	100 ⇨ 240 V ∿	12	8 relays 8 A				
Resin board	**NBR12**	**88 973 001**	24 V ⎓	8 (4 configurable as analog)	4 relays 8 A	•		•	
	NBR26	**88 973 061**	24 V ⎓	16 (6 configurable as analog)	10 relays 8 A	•		•	
	NBR32	**88 973 211**	24 V ⎓	20 (6 configurable as analog)	12 relays 8 A	•			
	NBR40	**88 973 231**	24 V ⎓	24 (6 configurable as analog)	16 relays 8 A	•			

* Millenium 3 Smart: backlit blue LCD display. Extended operating temperature range and function block library
**Millenium 3 Essential: Logic Controller with green screen and industrial temperature range

Millenium 3 accessories

Power supplies and DC/DC converters in modular casings

	Part number	Tension d'entrée	Input voltage	Nominal power	Output current
	88 950 303	100 ⇨ 240 V ∿	24 V ⎓	7.5 W	0.3 A
	88 950 304	100 ⇨ 240 V ∿	24 V ⎓	15 W	0.6 A
	88 950 307	100 ⇨ 240 V ∿	24 V ⎓	30 W	1.2 A
	88 950 302	100 ⇨ 240 V ∿	24 V ⎓	60 W	2.5 A
	88 950 305	100 ⇨ 240 V ∿	5 V ⎓	20 W	4 A
	88 950 306	100 ⇨ 240 V ∿	12 V ⎓	24 W	2 A
	88 950 320	9.2 ⇨ 18 V ⎓	12 V ⎓	10 W	0.8 A
	88 950 321	9.2 ⇨ 36 V ⎓	24 V ⎓	6 ⇨10 W	0.4 A

Connection accessories, tools and programming software

	Part number	Name
	88 970 111	M3 Soft: Millenium 3 programming software (CD-ROM)
	88 970 108	Memory cartridge for transfer and saving of programms
	88 970 102	3 m serial link cable: PC DB9 F ⇨ Millenium 3
	88 974 104	Millenium 3 ⇨ Bluetooth® interface (class A 10 m)
	88 970 109	3 m USB link cable: PC ⇨ Millenium 3
	88 970 110	Bluetooth® adaptor ⇨ USB (class A 10 m)
	88 970 123	1.80 m serial link cable: DB9 M/DB9 F
	88 970 510	0.5 m serial link cable: Millenium 3 ⇨ DB9 M
	88 974 106	Ready to use Millenium 3 Smart democase including: - a CD12 Smart, a CTN probe, a LDR probe, an I/O simulator - a 3 m USB link cable: PC ⇨ Millenium 3, a M3 Soft CD - a power supply 110 V-230 V∿

Name
Millenium 3 virtual Display
Android smartphone and tablet as well as Windows XP/7 PC application
Man/Machine interface
TFT-LCD compact 4.3" and 7" resistive touch panels - MTP6/50 (Réf 88 970 492), MTP8/50 (Réf 88 970 494) & MTP8/70 (Réf 88 970 496)*
Plug & Play remote LCD displays/keypads (Réf 88 970 410)*
Remote LED display - Input 0-10 V (Réf 88 950 400)*
Remote control communication solutions
Modem communication solutions M3MOD (Réf 88 970 117), GSM Modem (Réf 88 970 119) and STN Modem (Réf 88 970 118)*
Temperature probes and light sensors
NTC Temperature probes CTN2 PVC (Réf 89 750 174) / CTN2 Inox (Réf 89 750 182) / CTN3 Silicone (Réf 89 750 186)*
LDR Light sensors (Réf 89 750 183)*
0-10 V Temperature sensors (Réf 89 750 150 / 89 750 151 / 89 750 152 / 89 750 153)*
Temperature probes Pt100 & Thermocouple (Réf 79 696 030 / 79 696 031 / 79 696 032 / 79 696 033 / 79 696 034 / 79 696 035 / 79 696 036)
Temperature and signal converters
Thermocouple Pt100/Pt1000 ⇨ 0-10 V (Réf 88 950 150 / 88 950 151 / 88 950 152 / 88 950 153 / 88 950 154 / 88 950 155)*
PWM to 0-10 V/4-20 mA (Réf 88 950 112) to 0-10 V (Réf 88 950 108)*
Other accessories and kits
Standard Smart and Essential product kits
Removable connectors
Potentiometer ø 22 mm
Faceplates
