

Amphenol® RF

Global RF Solutions

APPLICATIONS/FEATURES

Remove BNC connectors with ease

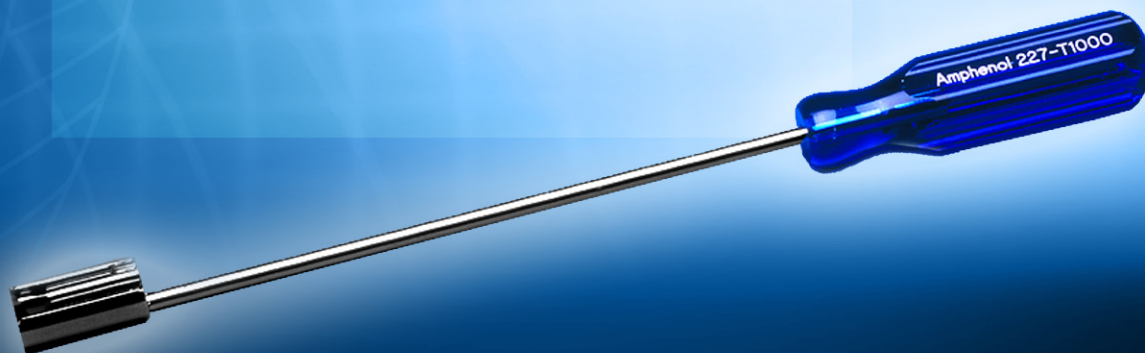

Specially designed to install and remove BNC connectors in high density or hard-to-reach locations

Works with all Major Manufacturer's BNC connectors

Wider barrel slot, allows tool to fit over large diameter cables, ex. Belden 9292

Comfortable driver-style plastic handle

Made of durable, high strength steel

BNC Tool

BNC Installation/Removal Tool

The 12" BNC installation/removal tool has been designed and manufactured for the true Broadcast and Telco installation professional. This tool will outperform all the other BNC installation/removal tools in the market today.

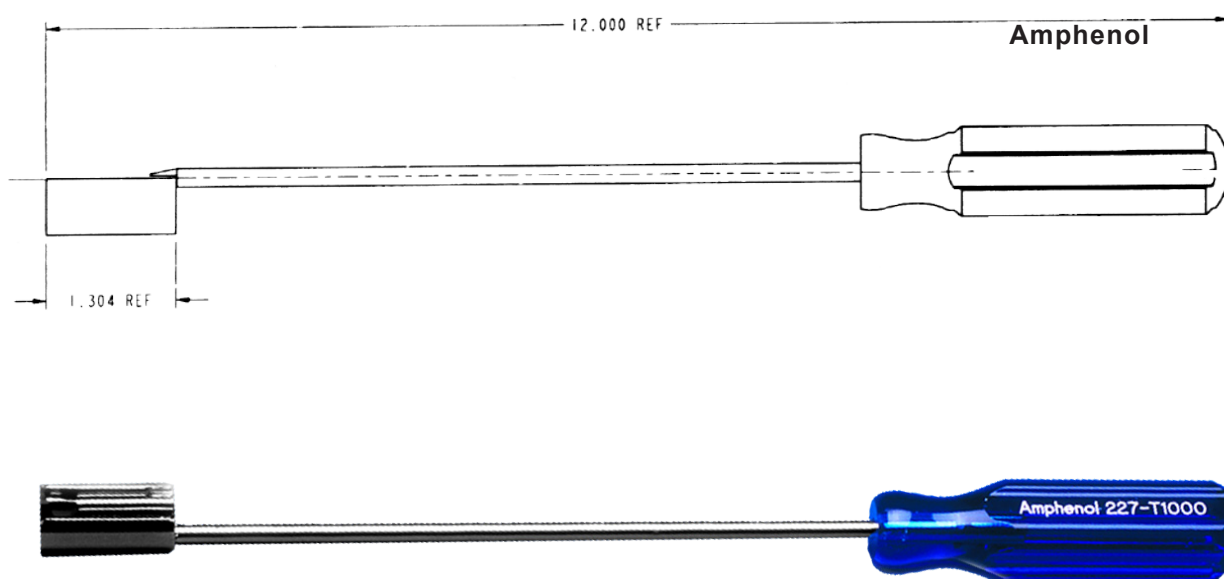

The Barrel of the 12" BNC installation/removal tool is precision machined from high strength tool steel and then heat treated for long life. This barrel will not stretch. This tool also has: a high strength tool steel shaft, a wider cable slot to fit over larger OD cables, a rust resistant clear zinc plating, and an extruded and polished resin handle. The 12" BNC installation/removal tool is available individually bagged for peg hooks thus facilitating ease in marking and packaging.
