10 Reasons to Use a SmartSwitch

1. Do you need to use multiple switches in your application?
2. Do multiple functions need to be easily accessed?
3. Are you trying to reduce panel size, streamlining your work flow and functionality?
4. Do you want to simplify operation and reduce operator error?
5. Does your equipment need to be set up for different languages?
6. Do you need a switch or a display?
7. Do you need to display video and/or photo animations (OLED models or just text and animated simple graphics (LCD models)?
8. Would a development or demonstration kit help speed your design process?
9. Are you looking for multiple LCD and backlight color options to indicate status?
10. Do you need software and hardware design assistance?
