Curtis Industries Acquires PREO EMI Filter Product Line

Curtis Industries, a Division of Powers Holdings, Inc., acquired the Preo brand EMI filter from Eastek International, Inc. of Buffalo Grove, IL a contract manufacturer.

The purchase of the Preo line will give Curtis additional product offerings to augment our current standard product line, Mr. Steven Powers, President, said. "This acquisition provides us with a South East Asia manufacturing site that will add to our Nogales, Sonora, Mexico and Milwaukee manufacturing sites," he said. "We've also added on of the largest worldwide distributors to our network of distributors selling Curtis products."

Curtis Industries has been in business for over 74 years, and has a significant market share in filters and terminal blocks. The company has a reputation for high quality, quick and responsive delivery of both standard and custom products to meet its customer's demands. This new line of filters will allow Curtis to further expand its market share.

Curtis Industries is a quality manufacturer of EMI Filters, Terminal Blocks and Liquid Level Controls. Curtis' products are manufactured under a rigorous component qualification program and inspected with the latest technology in automated testing of each assembly prior to shipping.

Curtis offers pre-compliance EMC testing services to assist customers in the selection of the appropriate filter for their specific application.
