# SPRING-LOADED TECHNOLOGIES ENHANCE PRECI-DIP'S ROLE OF PROVIDING SOLUTIONS FOR TELECOM APPLICATIONS SINCE MORE THEN 15 YEARS

PRECI-DIP has acquired a great deal of experience in the manufacture of spring-loaded contacts and connectors. Since production began in 1996, demand has grown steadily over the years.

## CREATIVITY & STRINGENCY

The telecommunications industry is a fast-moving sector. With a vertically integrated production structure and dedicated engineering and sales teams, PRECI-DIP is well prepared to address the requirements of today's demanding market and to meet the challenges of tomorrow's telecom applications.

PRECI-DIP strives to consolidate its leadership position by supplying the telecommunications market with the right spring-loaded interconnect solutions. Our engineering team strongly believes in the value of innovation and in the capacity to anticipate our customers' future needs.

In addition to standard products, PRECI-DIP will develop custom-designed products in compliance with stringent industry standards and requirements.

## TODAY & TOMORROW

Your PRECI-COM team will assist you in addressing your project needs - from concept development to delivery. In addition to design and manufacturing capabilities we offer effective support through all phases of the project.

### SPRING-LOADED CONTACT (SLC) CONNECTOR AND SOCKETS

- Miniature SLC for fine pitch arrangement

- SLC for flex antenna connection
- 3-way BTB interface connector RF application
