INNOVATIVE PRECI-DIP PRODUCTS ADDRESS THE PRIORITIES OF THE MEDICAL INDUSTRY AS WELL AS THE NEED FOR COMPLIANCE, PERFORMANCE AND RELIABILITY

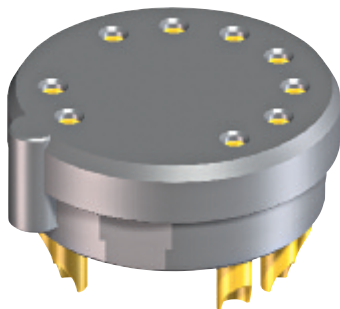

Products used in components for medical devices and appliances are different from all others in that they must address the very specific requirements, quality standards and critical challenges posed by the medical industry.

SETTING THE TREND

For many years PRECI-DIP has been dedicated to meet the demands of some of the most challenging markets. Its engineers continue to design components attaining ever higher levels of innovation.

Customers benefit from a wide range of experience gathered by PRECI-DIP in offering support in product development projects such as defibrillators, handheld instruments, X-ray and imaging equipment and respiratory-aid devices. Most recently, PRECI-DIP has developed a 100% beryllium-free contact.

Your PRECI-MED team is the right partner for your medical product development applications. It is committed to provide you with innovative products in compliance with stringent industry standards and in response to growing demands.

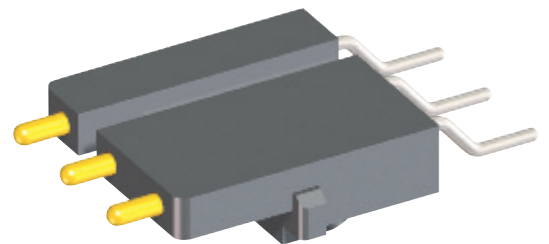

CONNECTOR FOR DENTAL TOOLS

- Connector for 1mm pin
- Orientated solder cups
- Connector sterilizable

SUBMINIATURE SOCKET CONTACT

- Beryllium free
- Application: Hearing aid
- Subminiature: 5mm (fig. 1:10)

3-WAY EDGE MOUNT CONNECTOR

- Clip in-line design with parallel mount
- Ultra-thin design of insulator body
