100%	0.250A - 5A	4 hours, Minimum
200%	0.375A - 5A	5 secs., Maximum
300%	0.250A	5 secs., Maximum
300%	0.375A - 5A	0.2 sec., Maximum

Description

The 435 Series are fast-acting surface mount thin-film fuses. Their ultra-small size (0402 size) makes them ideal for secondary protection of circuits used in space constrained applications such as hand-held portable electronic devices.

This series is 100% lead-free and meet the requirements of the RoHS directive. New Halogen-Free 435 Series fuses are available-to order use the "HF" suffix. See Part Numbering section for additional information.

Features

- 35A interrupt rating at 32VDC
- Small size with current ratings of 0.25 to 5.0 amperes
- Maximum protection of sensitive circuits as fuses are designed to open consistently in <5sec at 200% overload.

RoHS 🗭 HF 👫 🏵

• RoHS compliant, Lead-Free and Halogen-Free

Enhanced Breaking Capacity, High I²t

Applications

Secondary protection for space constrained applications such as:

- Cell phones
- DVD players
- Battery packs

- Hard disk drives.

- Digital cameras

Additional Information

1. Measured at 10% of rated current, 25°C.

2. Measured at rated voltage.

Temperature Re-rating Curve

Note:

1. Rerating depicted in this curve is in addition to the standard derating of 25% for continuous operation.

Example:

- For continuous operation at 70 degrees celsius, the fuse should be derated s follows: I = (0.75)(0.80)I_{RAT} = (0.60)I_{RAT}
- The temperature derating curve represents the nominal conditions. For questions about temperature derating curve, please consult Littelfuse technical support for assistance.
