

## LF-3200

# Soldering Station High Frequency

The Xytronic LF-3200 120W Digital Soldering Station has a digital temperature readout and a soldering temperature range of 200 to 500°C. Its high power and high frequency electronic circuitry maintains the soldering temperature within 3°C by means of a temperature sensor mounted in the head of the heating element which is in close contact with the actual soldering tip of the soldering iron.

Input	220 to 240V AC, 50Hz
Output	120W
Fuse	T3A, slow blow
Temperature range	200 to 500°C
Temperature correction range	+99 to -99°C
Dimensions	111 x 158 x 137mm (W x H x D)
Weight	2.3kg
