# MSKSEMI

**ESD** 

**TVS** 

**TSS** 

MOV

**GDT** 

**PLED** 

Broduct data speet

USB 2.0&3.0 power and data line protection

Digital video interface (DVI)

Notebook computers

Video graphics cards

Monitors and flat panel displays

10/100/1000 ethernet

SIM ports

**ATM** interfaces

#### PROTECTION SOLUTION TO MEET

IEC61000-4-2 (ESD) ±20kV (air), ±20kV (contact)

IEC61000-4-4 (EFT) 40A (5/50ns)

IEC61000-4-5 (Lightning) 5A (8/20μs)

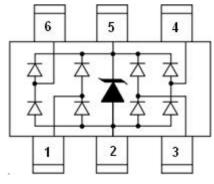

100 watts peak pulse power per line (t<sub>P</sub>=8/20µs)

Protects four I/O lines

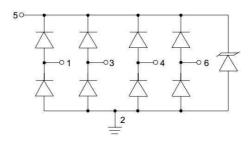

Low clamping voltage

Low operating voltage

Low capacitance

**PIN Configuration** 

Circuit Diagram

## **ABSOLUTE MAXIMUM RATINGS** (T<sub>A</sub>=25°C, RH=45%-75%, unless otherwise noted)

| Parameter  | Symbol           | Value           | Unit         |
|--|------------------|-----------------|--------------|
| Peak pulse power dissipation on 8/20µs waveform                | P <sub>PP</sub>  | 100             | W            |
| ESD per IEC 61000-4-2 (Air)<br>ESD per IEC 61000-4-2 (Contact) | V <sub>ESD</sub> | +/- 20<br>+/-20 | kV           |
| Lead soldering temperature                                     | TL               | 260 (10 sec.)   | $^{\circ}$   |
| Operating junction temperature range                           | TJ               | -55 to +125     | $^{\circ}$ C |
| Storage temperature range                                      | T <sub>STG</sub> | -55 to +150     | $^{\circ}$   |

## **ELECTRICAL CHARACTERISTICS** (T<sub>A</sub>=25°C)

| Parameter                               | Symbol           | Conditions  | Min | Тур  | Max | Unit |
|---|------------------|---|-----|------|-----|------|
| Reverse working voltage                 | V <sub>RWM</sub> |   |     |      | 5.0 | V    |
| Reverse breakdown voltage               | V <sub>BR</sub>  | I <sub>T</sub> =1mA                                   | 6.0 |      |     | V    |
| Reverse leakage current                 | I <sub>R</sub>   | V <sub>RWM</sub> =5V                                  |     |      | 1   | μA   |
| Forward voltage                         | V <sub>F</sub>   | I <sub>T</sub> =10mA                                  |     | 0.8  | 1.0 | V    |
| Clamping voltage<br>(I/O pin to Ground) | Vc               | I <sub>PP</sub> =1A, t <sub>P</sub> =8/20μs           |     | 9.5  | 11  | V    |
|   | Vc               | I <sub>PP</sub> =5A, t <sub>P</sub> =8/20μs           |     | 12.5 | 15  | V    |
| Junction capacitance                    | an agnacitance   | V <sub>RWM</sub> =0V, f=1MHz<br>Any I/O pin to Ground |     | 0.65 | 0.8 | nE   |
|   | CJ               | V <sub>RWM</sub> =0V, f=1MHz<br>Between I/O pins      |     | 0.3  | 0.5 | pF   |

## **Electrical Parameter**

| Symbol           | Parameter  |  |
|------------------|--|--|
| I <sub>PP</sub>  | Maximum Reverse Peak Pulse Current                 |  |
| Vc               | Clamping Voltage @ IPP                             |  |
| V <sub>RWM</sub> | Working Peak Reverse Voltage                       |  |
| I <sub>R</sub>   | Maximum Reverse Leakage Current @ V <sub>RWM</sub> |  |
| I <sub>T</sub>   | Test Current                                       |  |
| $V_{BR}$         | Breakdown Voltage @ I⊤                             |  |

## Suggested Pad Layout

## Note:

- 1.Controlling dimension:in millimeters.
  2.General tolerance:± 0.05mm.
  3.The pad layout is for reference purposes only.

## **REEL SPECIFICATION**

| P/N           | PKG      | QTY  |
|---------------|----------|------|
| AZC199-04S-MS | SOT-23-6 | 3000 |

## **Attention**

- Any and all MSKSEMI Semiconductor products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your MSKSEMI Semiconductor representative nearest you before using any MSKSEMI Semiconductor products described or contained herein in such applications.
- MSKSEMI Semiconductor assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all MSKSEMI Semiconductor products described or contained herein.
- Specifications of any and all MSKSEMI Semiconductor products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- MSKSEMI Semiconductor. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with someprobability. It is possiblethat these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits anderror prevention circuitsfor safedesign, redundant design, and structural design.
- In the event that any or all MSKSEMI Semiconductor products(including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from theauthorities concerned in accordance with the above law.
- No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written permission of MSKSEMI Semiconductor.
- Information (including circuit diagrams and circuit parameters) herein is for example only; it is not guaranteed for volume production. MSKSEMI Semiconductor believes information herein is accurate and reliable, but no guarantees are made or implied regarding its use or any infringements of intellectual property rights or other rights of third parties.
- Any and all information described or contained herein are subject to change without notice due to product/technology improvement, etc. Whendesigning equipment, referto the "Delivery Specification" for the MSKSEMI Semiconductor productthat you intend to use.
