

## Qualtek gains *SuperSpeed* with USB 3.0

*Design Solutions for Global Demands*

Qualtek Electronics broke the speed barrier this year with the introduction of its USB 3.0 aka *SuperSpeed* to its stout product lineup.

*SuperSpeed* (USB 3.0) delivers increased speed for all your latest technological needs; external hard drives, HD Video devices, High Mega-Pixel cameras, Video capture devices, multi-channel audio interface devices and many more. 3.0 uses bi-directional data interface, which nearly provides ten times the data transfer of all uses for USB devices in comparison to USB 2.0. With the increase in USB powered devices and the amount of power they demand, the new 3.0 standard elevates the power available to these devices by up to 80% from USB 2.0. One of the greatest benefits of USB 3.0 is simply the ability to be 100% backwards compatible with USB 2.0 receptacles, meaning you can have a 3.0 device plugged into a 2.0 or vice versa and the device will continue to work as designed.

All Qualtek products meet or exceed the RoHS EU and Chinese directives, with most products being REACH compliant. We strive to be up to date on current safety regulations provided by agencies around the world to ensure Qualtek provides the safest and most reliable product.

Qualtek Electronics Corporation is the leading supplier of AC Receptacles, Cable Assemblies, EMI Power Line Filters, Fans & Fan Accessories, Heat Shrink Products, Power Cords & Cordsets, Power Supplies, Thermal Circuit Breakers & Wiring Devices. International Procurement Services (IPS), a division of Qualtek, provides a complete range of offshore services from component sourcing to complete turnkey projects.
