

**Does LEMO have connectors to facilitate robotic connections using robot telemanipulator action?**

**Yes.** The LEMO **N Series** Connector was designed specifically for robotics use in telemanipulator applications. In addition, LEMO has several models in LEMO B Series, S Series, K Series, and E Series connectors, which are also suitable.

**See Remote Handling Connector Datasheet for more detailed information**

---

**Does LEMO have gamma radiation tolerant (rad-hardened) connectors?**

**Yes,** LEMO has several connector series that have optional Stainless Steel shells, PEEK inserts, and for wet environments the sealed versions have optional EPDM seals. (Note: EPDM seals are standard on the N Series).

**See Remote Handling Connector Datasheet for more detailed information**

---

**Does LEMO have remote handling or telemanipulator connectors for low power manipulators?**

**Yes,** the "**Y**" type units on the LEMO **N Series** have a lever to assist with mating and unmating.

**See Remote Handling Connector Datasheet for more detailed information**
