

Mission

E-T-A offers a wide spectrum of intelligent solutions, setting the pace worldwide. To achieve this we need to balance three key factors - our customers, our personnel and our capital investment.

This modern sculpture in the entrance of E-T-A's headquarters reflects our vision. Each of these interests is represented by a sphere, supported on a triangular base depicting the enterprise. Just like the sculpture, equilibrium is only achieved when these factors are all in harmony, and E-T-A is an ideal example of this perfect balance.
