

INTERTEGO, New Industrial Desktop Enclosures

INTERTEGO, an extruded aluminum enclosure, is an innovative design system that will make your product stand out. Two heights, three widths, and three depths offer a multitude of sizing options with plenty of space to accommodate electronic equipment.

These enclosures are ideally suited for applications requiring electronic shielding, and with a little upgrade, INTERTEGO can be converted to a 19" enclosure. All components are designed for easy assembly and INTERTEGO has a comprehensive range of accessories, which opens up many new fields of applications. Rose+Bopla can offer machining, silk-screening, custom colors, and membrane keypads to complete your design.

2 U Height (mm)	Width (mm)	Depth (mm)
99.85	250.36	184.4
99.85	250.36	244.4
99.85	250.36	304.4
99.85	357.04	184.4
