

ADSP-TS201S EZ-KIT Lite, Version 1.1

Reference Design Information

Introduction:

This package contains all of the electronic information required for the design, layout, fabrication and assembly of the ADSP-TS201S EZ-KIT Lite.

This information is provided for reference only. Analog Devices is not responsible for any errors that may be contained in the information. There is no support provided for any of this information and no additional information will be provided.

Proprietary Analog Devices information regarding the USB debugging interface has been removed.

This information is only provided in the software programs described below, and is not available in any other formats.

Package Contents:

Schematic (directory)

- Complete schematic project including netlist, bill of materials, and symbols.
- Created with Innoveda eProduct Designer, version 3.0.

Layout(Pads) (directory)

- .pcb layout file created from Pads PowerPCB, version 5.0

Layout(PDF) (directory)

- all of the board layers, fabrication drawings, and assembly drawings in PDF format

Fabrication (directory)

- Contains all the Gerber files and N/C drill information needed to fabricate the board.

Assembly (directory)

- Containing all the standard files needed to assemble the board.
