

You asked us for more training on RF products and Software.....***we delivered.***

We have added new classes, new dates and new locations.

To help reduce your cost of training the **Las Vegas** location includes **hotel accommodations and lunch daily !!!!**

**Register early and save even more!! Register and confirm payment 30 days in advance of class and receive a 5% discount off the list price.**

### ***Take your knowledge to the next level***

RF measurements are challenging and you need real insights fast. With tight schedules and increasing budget pressures, today more than ever, you need quick and accurate measurements, unique innovations that simplify complex tasks and eliminate repetitive chores.

Learn to quickly develop manageable test software with Agilent's VEE Pro. Designed for easy expansion, flexibility, and compatibility with the latest industry standards,

Agilent training courses provide you with technical knowledge and hands-on experience to help you get the most out of your equipment and enable you to make accurate and efficient measurements.

Agilent training gives you and your customers' confidence that your training is up-to-date.

### ***Who should attend training?***

Installation and maintenance technicians and operators of RF communication systems:

- Installers and Field Service Technicians
- Scientists, engineers, and technicians who need to automate measurements and analyze data
- Design and Field Engineers
- Engineers and technicians who work with RF & Microwave test instruments
