

### Description

YTLP2303D is a high-performance, miniature filter designed for mobile equipment with LTE B40 band. It is designed with Film Bulk Acoustic Resonator (FBAR) technology, which can provide low insertion loss and steep skirt. So that this product enables coexistence of Wi-Fi signals within the same device or in close proximity to one another.

For general performance, the YTLP2303D typical insertion loss in the pass band is less than 1.0dB, and max insertion loss is within 2.0dB over -20~+85°C, while the typical rejection at the Wi-Fi and LTE41 band are more than 35dB.

For the chip package, the YTLP2303D uses advanced module packing techniques to achieve the industry standard 1.4x1.1x0.6mm footprint, include bumping and flip chip.
