3.2 The tolerance of position against SWG type receptacle

3.2.1 MM206417 has a centering function by its design, +/-0.5mm is permitted against the hole center of SWG type receptacle.

Please avoid needless force to SMPM interface when MM206417 is disengaged from SWG type receptacle and comes back to its original position.

To avoid the needless force, please use extension cable assembly, MXHQ87SM3000/MXHR87SN3000 (Figure 4/Figure 5).

Centering function +/-0.5mm may not be permitted against the hole center of SWG type receptacle, when MM206417 is affected by the needless force.
