

LM78Mxx Precision 500 mA regulators

Features

- Output current to 0.5 A
- Output voltages of 5; 6; 8; 9; 10; 12; 15; 24 V
- Thermal overload protection
- Short circuit protection
- Output transition SOA protection
- $\pm 2\%$ output voltage tolerance
- Guaranteed in extended temperature range

Description

The LM78Mxx series of three-terminal positive regulators is available in DPAK packages and with several fixed output voltages, making it useful in a wide range of applications. These regulators can provide local on-card regulation eliminating the distribution problems associated with single point regulation. Each type employs internal current limiting, thermal shutdown and safe area protection, making it essentially indestructible. If adequate heat sinking is provided, they can deliver over 0.5 A output current. Although designed primarily as fixed voltage regulators, these devices can be used with external components to obtain adjustable voltage and currents.

3 Maximum ratings

Table 2. Absolute maximum ratings

| Symbol | Parameter | | Value | Unit |
|-----------|--------------------------------------|-------------------------|--------------------|------|
| V_I | DC input voltage | for $V_O = 5$ to 18 V | 35 | V |
| | | for $V_O = 20, 24$ V | 40 | |
| I_O | Output current | | Internally limited | mA |
| P_D | Power dissipation | | Internally limited | mW |
| T_{STG} | Storage temperature range | | -65 to 150 | °C |
| T_{OP} | Operating junction temperature range | for LM78MxxC | 0 to 70 | °C |
| | | for LM78MxxI | -40 to 85 | |

Note: Absolute maximum ratings are those values beyond which damage to the device may occur. Functional operation under these condition is not implied.
