

FEATURES

- Heavy Industrial CE Approved
- As low as ±0.1% Pressure Non-Linearity
- As low as ±0.75% Total Error Band (TEB)
- -10 to 60°C Compensated Temperature
- Operating Temperature (Battery):
 - -20 to 60°C (Panasonic/Energizer CR2032)
 - -20 to 70°C (Sony/MuRata CR2032)
 - -20 to 85°C (Murata CR2050W)
- Withstands 50g shock and maximal 10g Vibration
- Excellent Long-term Stability

APPLICATIONS

- Gas and Liquid Flow Measurements
- Tank Liquid Level Measurements
- Liquid and Gas Filter Monitoring
- Corrosive Gases and Liquids
- Remote and Hard to Reach Locations
- Factory Process Control
- Energy Generation and Management

MEAS U5600

Wireless Pressure Transducer

- 316L Stainless Steel Wetted Surfaces
- Bluetooth 4.2 Wireless Communication
- Pairing Mode or Advertising (Beaconing) Mode
- 32-Bit Digital Pressure Data Output
- 16-Bit Digital Temperature Data Output
- Weatherproof IP65 Rating
- Variety of Pressure Ports
- CR2032/CR2050W Battery Compatible

The M5600 series from TE Connectivity's Sensors Business Unit sets the price and performance standard for wireless pressure transducers used in demanding industrial and smart factory applications.

The modular U5600 wireless pressure transducer from our UltraStable line is enclosed in a stainless steel and PBT housing. This high accuracy, 24-bit ADC digital output wireless transducer eliminates hard wiring and provides remote process control and monitoring via Bluetooth® 4.2 Wireless Communication. This series is suitable for measurement of liquid or gas pressure, even for difficult media such as contaminated water, steam, and mildly corrosive fluids.

The wetted surfaces of the pressure ports are made from 316L stainless steel. The port design uses no internal O-rings or organics exposed to the pressure media which provides excellent durability and long-term performance.

The M5601 is FM certified for Intrinsic Safety: IS Class I, Div1, Groups A, B, C, and D; Class I Zone 0, AEx ia IIC T4 Ga; Ex ia IIC T4 Ga; II 1 G Ex ia IIC T4 Ga

FCC, ISED and RED compliant

Signal Pairing Distance	65 feet				
Signal Transmission Distance		65 feet affected by recei		eceiver antenna a	nd blocking objects
Battery Life	1-year typical CR2032 210mAH battery; 1 minute transmission interval. 2-years typical CR2050W 350mAH battery, 1 minute transmission interval.				
Low Battery Warning	2.5V _{DC} , red battery symbol in app				
Weatherproof			IP65		
Pressure Port Material	316L Stainless Stee		el Port, 316L Stainless Steel Snubber		
Enclosure	Stai		inless Steel and PBT		
Shock	50g, 11msec Half Sine Shock per MIL-STD-202G, Method 213B, Condition A				
Vibration		10Hz to 55	Hz, double an	nplitude 1.52mm, E	EIA-364-28F, Condition I

Note:

Battery life depends on its capacity, operating temperature and signal transmission interval.

Temperature can impact battery capacity retention even in idle. Check battery specifications for more details.

Factory default data transmission rate is 5sec, which can be adjusted from 100msec to 5sec in smartphone app or PC software.

COMPLIANCE

EN 55032 Emissions Class A & B

IEC 61000-4-2 Electrostatic Discharge Immunity (4kV contact/8kV air)

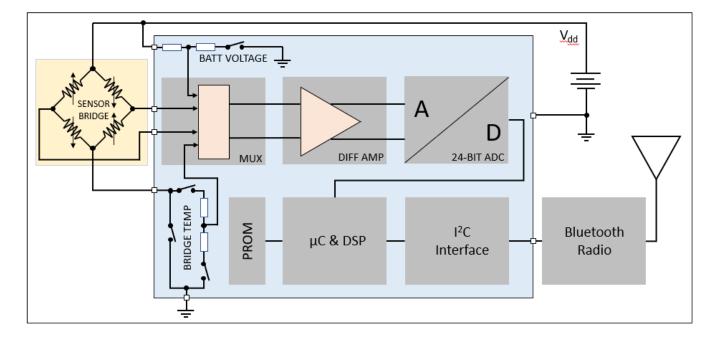

IEC 61000-4-3 Radiated, Radio-Frequency Electromagnetic Field Immunity (10V/m, 80M-1GHz); Shift <1.5%

FCC Part 15 Subpart B Unintentional Radiators (US)

ICES-003 Unintentional Radiators (Canada)

RED ETSI EN 301 489-1 V2.1.1 & ETSI 301 480-17 V3.2.1 (Europe)

BLOCK DIAGRAM

Specific conditions of use

1. The non-metallic parts incorporated in the enclosure may generate an ignition-capable level of electrostatic charge. Upon installation, care shall be taken to avoid locations where the external conditions are conductive to the build-up of electrostatic charge on such surfaces. Additionally, the equipment shall only be cleaned with a damp cloth.

2. The Bluetooth Pressure Transducers do not have an earth ground terminal. The transducers shall be earth grounded as part of the final installation.

3. The Model M5601-xxx1xx-xx and Model U5601-xxx1xx-xx Pressure Transducer shall use only the CR2032 Panasonic or Energizer cell. The ambient range is Ta = -20°C to +60°C.

4. The Model M5601-xxx2xx-xx and Model U5601-xxx2xx-xx Pressure Transducer shall use only the CR2032 Sony/Murata cell. The ambient range is Ta = -20°C to +70°C.

5. The Model M5601-xxx3xx-xx and Model U5601-xxx3xx-xx Pressure Transducer shall use only the CR2050W Murata cell. The ambient range is Ta = -20°C to +85°C.

HOW TO OPERATE

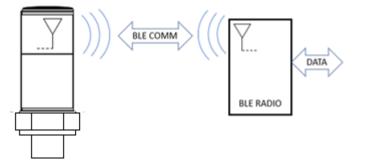

Please refer to the M5600_U5600 Installation Manual and M5600_U5600 Software Manual.

COMMUNICATION PROTOCOLS

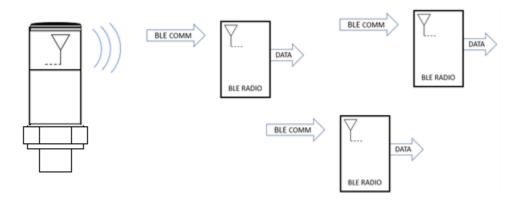

Pairing mode (Model U560x - xx0):

- The device is set up to be both discoverable and connectable.
- The device is constantly listening for a signal from any other Bluetooth device within range that might send out an inquiry for connection (connection request).
- Once a signal is received and acknowledged, a single two-way communication channel is established, and the two devices will only communicate with each other or be paired.

Advertising (Beaconing) mode (Model U560x - xx1):

- When power is first applied (insert battery), the device enters the configuration mode (six hours long) which facilitate pairing so updates and software changes can be made. The device is set up to be discoverable but connectable for configuration.
- Six hours after the last pairing, the transducer will switch to low power advertising mode and begin transmitting data. The device is constantly transmitting data (advertising) at higher intervals to save battery. Any other Bluetooth device within range can receive the data and may establish a two-way connection for configuration.
