PRIMARY CHARACTERISTICS	
$I_{T(AV)}$	320 A
Type	Modules - thyristor, standard
Package	MAGN-A-PAK

**DESCRIPTION**

This VSK series of MAGN-A-PAK modules uses high voltage power thyristor/thyristor in doubler circuit configuration. The semiconductors are electrically isolated from the metal base, allowing common heatsinks and compact assemblies to be built. They can be interconnected to form single phase or three phase bridges or as AC-switches when modules are connected in anti-parallel mode. These modules are intended for general purpose applications such as battery chargers, welders, motor drives, UPS, etc.
