LF PTN# A0093 Manufacturing location change: SmartGlow fuses

February 11, 2016

Dear Valued Customer,

In an ongoing effort to improve efficiencies in our manufacturing locations, Littelfuse is changing the manufacturing location of our ATO SmartGlow and Mini SmartGlow products. The part numbers and UPC numbers will not change, but the Country of Origin will change from Mexico to Taiwan. This change will not impact the Maxi SmartGlow or the Glass Fuse SmartGlow products since these materials are already manufactured in the Taiwan location.

Since this is a running change without change to material number or UPC number, shipments may contain cartons of materials produced in Mexico as well as cartons of materials produced in Taiwan. The individual cartons will contain materials only from Mexico or only from Taiwan, and correct Country of Origin is defined by the carton label.
