Semtech Products

Short Form Catalog

Product Highlights

A promotional graphic for LinkCharge CT. It features a laptop keyboard, a calculator, and a smartphone with a green battery icon and concentric green circles around it, symbolizing wireless charging. The text "LinkCharge™ CT" is in large bold letters, followed by "Wireless Charging Anywhere" and "(page 18)" in smaller text.

LinkCharge™ CT

Wireless Charging
Anywhere

(page 18)

A promotional graphic for Automotive ESD Protection. It features a wireframe car and a black rectangular component with the Semtech logo. The text "Automotive ESD Protection 2-Line Surge" is in large bold letters, followed by "RClamp® 0512TQ" and "(page 4)" in smaller text.

Automotive ESD Protection 2-Line Surge

RClamp® 0512TQ

(page 4)

A promotional graphic for Signal Integrity Products. It features a blue background with a fiber optic cable emitting light. The text "Signal Integrity Products" is in large bold letters, followed by "High Performance ICs for Optical Transceivers" and a list of applications: "Cloud Computing • Social Networking Video Streaming • Mobile Usage Datacenter • Access (PON/FTTx) Wireless Infrastructure". The page number "(page 26)" is at the bottom.

SEMTECH
A World of Solutions™

AEC-Q100 Automotive Qualified

OUR EXPANDING COMMITMENT

As the automotive infotainment market increases, so does our commitment to power, protect and connect customers with the perfect IC solutions. Semtech has provided ICs for the automotive industry for many years, and our devices are used in applications ranging from protecting sensitive electronics to in-cabin lighting and touch screen interface. Today, we continue to work on expanding our list of AEC-Q100 certified products for future applications.

Two-wire Ethernet
ADAs, 360 Camera View, Audio

Antennas
AM/FM, DAB, GPS, Satellite, WiFi,

Power Management - LED Drivers - AEC-Q100 Qualified

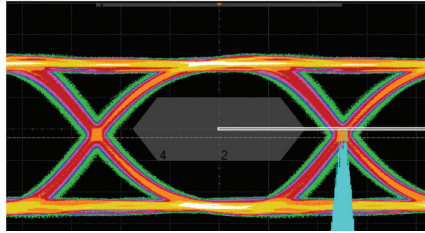

Part Number	V _{IN} (V)		V _{OUT} (V) Max	Fsw (MHz)	# LEDs per string* V _f =(3.5V)	# of Strings	String Current (mA)	Dimming Max Freq.	Package (mm)	Features
	Min	Max								
SC441A	4.5	21	36	0.7	10	4	150	up to 50kHz	TSSOP-20 EDP	Open/Short LED string disable, OCP, OTP, OVP, and FFLAG
SC445Q	4.5	27	42	0.7	12	4	150	up to 50kHz	TSSOP-20 EDP	Adj SCP level, Open/Short LED string disable, OCP, OTP, OVP, and FFLAG
SC5012/Q	4.5	45	65	0.2–2.2	18	4	150	up to 30kHz	MLPQ-24, 4x4	I ² C, FSYNC, 5000:1 Phase shifted PWM dimming

TVS Protection - Key Advantages

Semtech Transient Voltage Suppressors (TVS) safeguard circuits against damage or latch-up caused by ESD, lightning and other destructive voltage transients. Our protection devices feature low clamping voltage, low capacitance and low leakage current.

LOW CAPACITANCE

Provides robust protection while preserving signal integrity in high-speed video and data interfaces

PRODUCT PLATFORMS

TClamp® = TransClamp
High surge lightning current handling capability

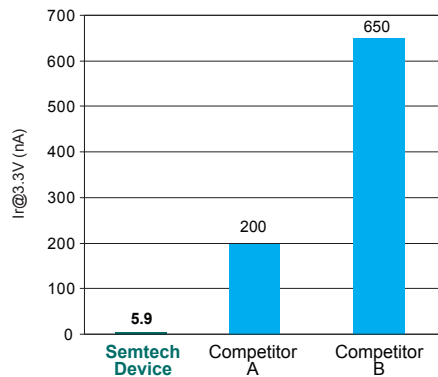

RClamp® = RailClamp
Low capacitance for high-speed applications

μClamp® = MicroClamp
Single TVS or TVS arrays for general purpose, standard TVS Process

EClamp® = EMIClamp
ESD and EMI protection with integrated inductor or resistor

LOW LEAKAGE

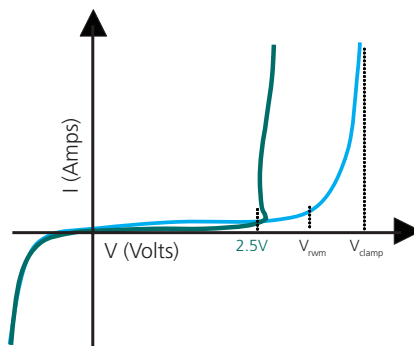

Increases battery life in handheld electronic devices

LOWER WORKING VOLTAGE

Reduces stress energy to protected IC

— Typical 5V TVS IV Curve
— Semtech low V_{RWM} IV Curve

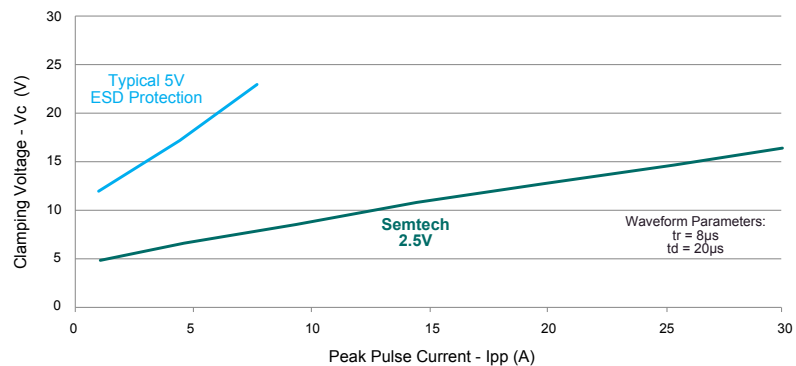

KEY ESD PROTECTIONS

- ESD
- ESD-EMI filter
- High-current lightning
- Low capacitance ESD
- Low voltage ESD

LOW CLAMPING VOLTAGE

Better protection and less stress on transceiver

TVS Key Product Applications

Key Applications					
Application (Port)	Part Number	# of Lines	Voltage (V)	Max Capacitance (Line-GND)	Protection level (A) (8/20μs)*

HDMI, Ethernet & USB 3.0 Protection

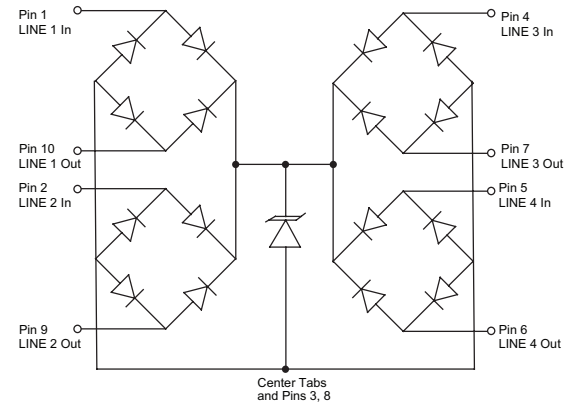

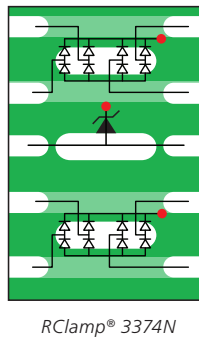

HDMI PROTECTION

- RClamp® 3328P (3.8x1.0mm)
- RClamp® 7524T (1.3x0.7mm)
- Flow-through layout
- More than 50% PCB savings
- Low capacitance (0.25 typ) to minimize signal degradation

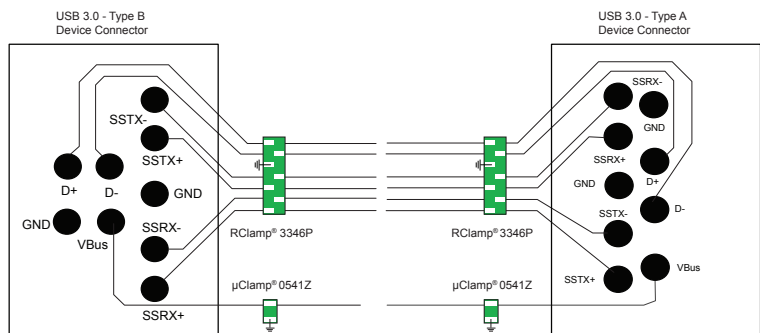

GIGABIT ETHERNET PROTECTION

- RClamp® 3374N (3x2x0.60mm)
- 3.3V working voltage
- Low capacitance: 1.7pF I/O to I/O
- Flow-through layout
- Low clamping voltage performance
- High surge rating: 40A Ipp (8x20μs)

USB 3.0 PROTECTION

- RClamp® 3346P (2.7x0.8x0.50mm)
- μClamp® 0541Z (0.6x0.3x0.25mm)
- Extremely low clamp across entire ESD event
- Low capacitance to minimize signal attenuation
- Low dynamic resistance

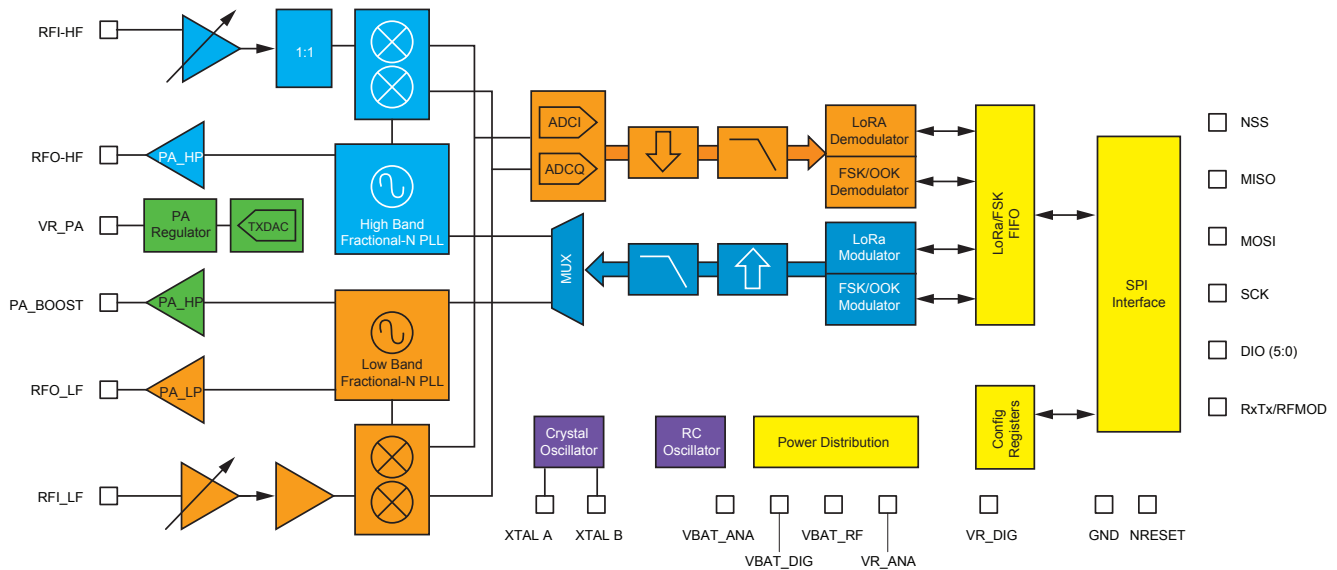

LoRa® — The Ultimate Long-Range Solutions

Ideal for eliminating repeaters, reducing infrastructure cost, extending battery lifetime, and improving network capacity

LoRa® PRODUCTS

- Long range of up to 30 miles outdoor line of sight
- Deep indoor coverage for hard to reach areas
- Bi-directional communication link with adaptive data rates
- Low power sensors with extended battery lifetime of up to 20 years
 - 100nA sleep mode
 - 9.7mA active receive mode
- LoRa, LoRaWAN™ and FSK compliant
- GFSK modes supported by a single radio
- Scalable, multi-channel, high-capacity gateways powered by SX1301/SX1308
- Available for any environment
- LoRa modulation offers 30dB improvement over FSK for co-channel interference rejection
- Programmable registers for maximum flexibility
- Footprint-compatible ICs for global coverage
- Supported by over 400 members of LoRa Alliance™ that defines the open LoRaWAN™ protocol
- Large and growing online developer community for LoRa-based products
- Public, semi-private and private networks available worldwide

SX1276 BLOCK DIAGRAM

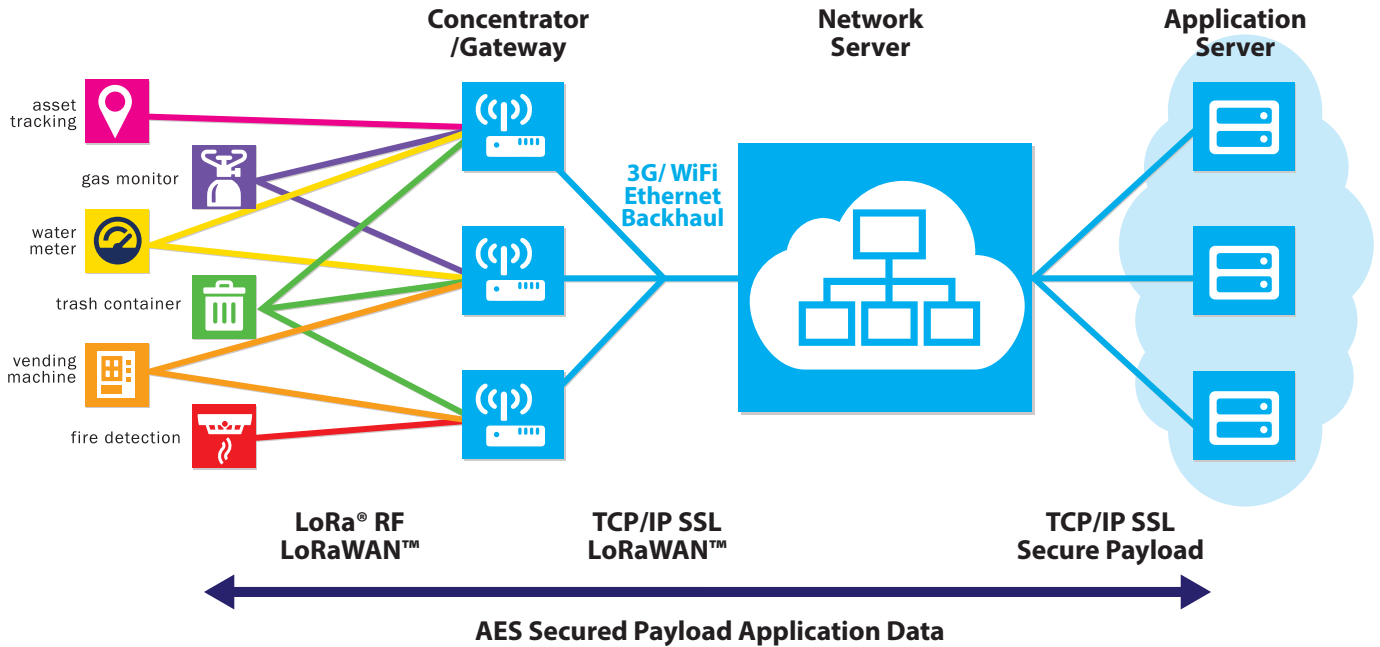

LoRa® Products

Part Number	Frequency Range (MHz)	Link Budget (dB)	RXCurrent (mA)	FSK Max DR (kbps)	LoRa DR (kbps)	Max Sensitivity (dBm)	TX Power (dBm)
SX1272	862–1020	158	10	300	0.3–40	-138	+ 20
SX1273	862–1020	150	10	300	1.7–40	-130	+ 20
SX1276	137–1020	168	11	300	0.018–40	-148	+ 20
SX1277	137–1020	158	11	300	1.7–40	-138	+ 20
SX1278	137–525	168	11	300	0.018–40	-148	+ 20
SX1279	137–960	168	11	300	0.018–40	-148	+20

LoRa® Gateway/Concentrator Solutions

The ultimate long-range, high-capacity solution for IoT and M2M networks

KEY FEATURES OF SEMTECH'S LoRa WIRELESS RF TECHNOLOGY

- Long Range** Penetrates in dense urban and deep indoor environments, connecting to sensors up to 30 miles away in rural areas
- Low Power** Designed specifically for low power consumption extending battery lifetime up to 20 years
- High Capacity** Supports millions of messages per base station
- Geolocation** Enables GPS free, low power tracking applications
- Standardized** LoRaWAN specification ensures global interoperability among applications, IoT solution providers and telecom operators
- Secure** Embedded end-to-end AES-128 encryption of data for optimal privacy and protection
- Low Cost** Reduces costs three ways: infrastructure investment, operating expenses and end-node sensors

PICOCELL SOLUTIONS

- LoRa Picocell platforms are designed for a variety of indoor applications such as home, small business and buildings.
- SX1308 picocell IC is coupled with a SX1255 or SX1257 LoRa RF transceiver, and is expected to help bring low cost LoRaWAN networks to market for consumers and private enterprises.

GATEWAY SOLUTIONS

- Multi-channel, multi-modem receiver including LoRa and FSK modems
- Inherent two-way communication
- Receives simultaneously different data rates on same channel

RF ICs for Gateways and Picocells

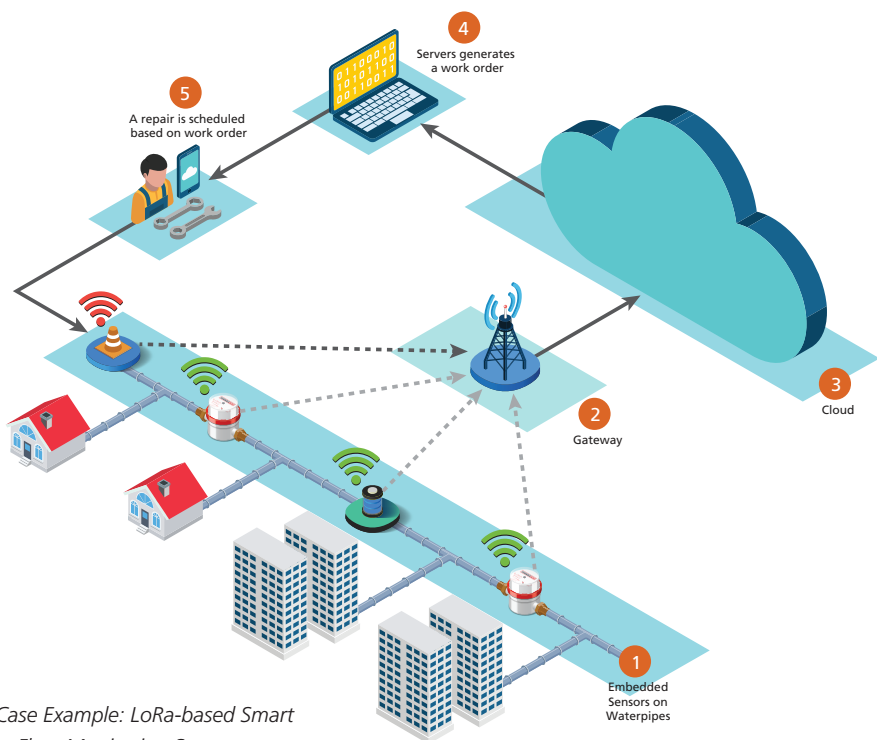

Part Number	Tx/Rx	Operating Temp. Range	LoRa Modem	FSK Modem	Capacity
SX1301	Tx/Rx	-40–85°C	9	1	Varies by application
SX1308	Tx/Rx	0–70°C	9	1	Varies by application

RF Transceivers

Part Number	Tx/Rx	Band (MHz)	Tx Power	NF
SX1257	Tx/Rx	860–1000	-20–8	7
SX1255	Tx/Rx	400–510	-20–8	7

LoRa-based Smart Sensors

With over 20 years of experience providing RF communications and sensing ICs for battery-operated sensors. Semtech offers the widest range of RF ICs for ultra long range, narrow-band, and wide-band M2M communications.

Use Case Example: LoRa-based Smart Water Flow Monitoring System

High-Link Budget

- 30dB higher than competing devices when using a low-cost BOM

High Rx Sensitivity Solutions

- Up to -148dBm of sensitivity

7x Lower Power Consumption

- 100nA sleep
- 2.5mA Rx
- 27mA @ +13dBm Tx

Support for Major Wireless Communications Protocols

- LoRaWAN™
- IEEE 802.15.4g
- Wireless M-Bus
- 6LoWPAN

RF ICs for Smart Sensors

Touch & Proximity Controllers

The superior sensitivity of the Semtech touch sensor platform enables sensing through a thick overlay material. Semtech's proximity detection has an extended range (>10cm). These devices all come in a tiny footprint with zero components per input.

Key Features

- Extreme low power
- Support button, slider and wheel design
- Proximity detection (>10cm)
- Built-in LED drivers (up to 15mA)
- 256-step intensity control (Lin/Log)
- Auto lightening
- Field programmable
- Fast scan time (15ms)
- Overlay (>5mm)
- Smart auto-offset compensation
- Ultra-small footprint
 - QFN-28 (4x4mm)
 - QFN-32 (5x5mm)
 - QFN-32 (4x4mm)
 - TSSOP-24 (4.4x7.8mm)

Applications

- Tablet eBook
- Flat panel TV
- LCD monitors
- White goods & appliances
- Printers
- Automotive audio consoles
- Personal media players
- Set Top Boxes (STBs)
- Game consoles
- Industrial systems

Smart Proximity Sensors

Semtech advanced capacitive sensing solutions provides best-in-class sensitivity (down to sub fF) with unique human discrimination feature to enhance near range proximity detection. These products are commonly used in wireless-enabled consumer devices (i.e. smartphones, tablets, notebook) for smarter RF control.

Key Features

- Highest performance sensor on the market that enables longest distance/smallest area
- Strongest immunity to common RF noise (minimize interference)

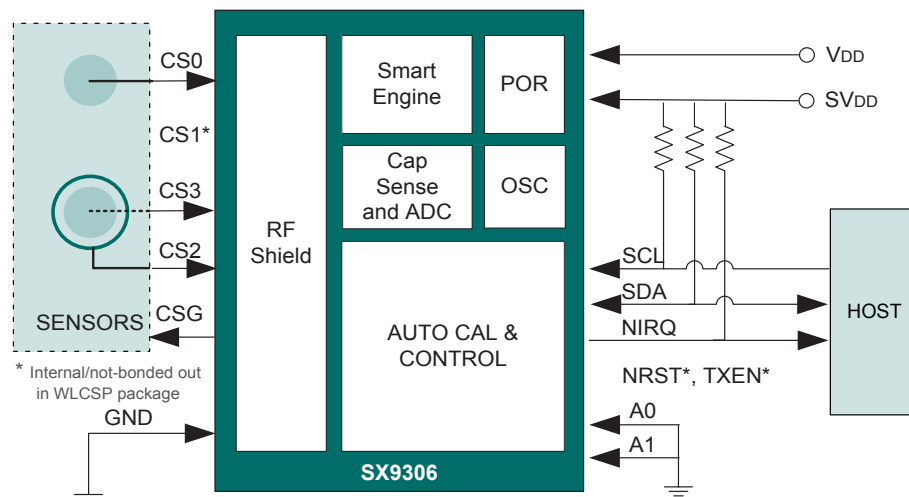

- Lowest power for extended battery life (2.5uA at Sleep, <10uA at Doze)
- Capacitive resolution down to 0.04fF
- Patented on-chip smart engine for human detection
- Built-in automatic calibration
- Advanced temperature comp.
- Active sensor guard
- Programmable I²C or standalone mode
- Extremely small footprint

Applications

- Smartphone
- Tablet
- Wearables
- Notebooks (Ultrabook, Detachable, 2-in-1)
- Hotspot
- Portable gaming devices
- Wireless-enabled devices

High Performance Touchscreen Solutions

Semtech offers fully integrated touch controllers in both capacitive and resistive technologies with ultra low power consumption (as low as 0.4uA) and robust on-chip ESD protection (up to $\pm 15\text{kV}$ ESD) to support different human interface design in portable handheld applications (i.e. smartphones, wearable devices). Many of these products have the capability to sense in the X, Y and Z dimensions allowing for multi-touch and gesture control as well as providing tactile feedback to enhance the user experience.

Key Features

- Low power (0.4 μA)
- Compatible with a wide range of resistive panels
- Enables multi-touch gestures with 4-wire touch panel
- Built-in proximity detection with any panel (>5cm)
- Integrated haptic motor control (LRA & ERM)
- 12-bit resolution

Applications

- Portable navigation devices
- Automotive center consoles
- Digital photo frames
- DSC, video cameras
- Handheld games & mobiles
- POS terminals
- Control panels

General Purpose Parallel Input/Output (GPIO)

General Purpose Parallel Input/Output (GPIO) expanders are ideal for low power handheld battery powered equipment. Our IO expanders come in 4-, 8-, and 16-channels of I/Os operating with a VDD range of 1.2V to 5.5V connecting easily to today's low core voltage chipsets in battery powered handheld applications without the need for level translating circuits.

Key Features

- 4/8/16 channel of I/Os
- True bi-directional style I/O
- Programmable Pull-up/Pull-down Push/Pull outputs
- 1.2V to 5.5V independent operating voltage for all supply rails (VDDM, VCC1, VCC2)
- 5.5V compatible I/Os, up to 24mA output sink (no total sink current limit)
- Fully programmable logic functions (PLD)
- 400kHz two wire I²C compatible slave interface

Applications

- Smartphones, PDAs, MP3 players
- Digital cameras
- Portable multimedia players
- Notebooks
- GPS devices

Power Line Communications

Semtech Power Line Communications (PLC) and Hybrid (PLC+RF) series of products enable communication via low-voltage, medium-voltage power lines and through the air. PLC has long been a favorite application for utility companies because it allows them to reliably move data over infrastructure that they own and control. One of the main benefits of PLC to utilities is that it efficiently addresses their communications needs across a vast array of applications (metering, substation monitoring, load control and load shedding, home energy management, etc.) all focused on collectively addressing energy management tasks. Our PLC and Hybrid products platforms work on medium voltage (MV), low voltage (LV) and over the air networks, and our SoC offers both end-device and DCU/Service Node functionalities throughout the PHY, MAC and Convergence layers with IPV6 addressing.

The EV8600 Series comprises a hybrid sub-GHz RF + narrowband PLC single-chip transceiver SoC with both modems capable of simultaneous or independent operation. The EV8600 Series is a fully programmable single-chip soft PLC solution that not only comprises flexible analog front-end and digital (PHY + MAC) sections, but also supports upper networks layers up to and including IPV6. It also comprises integrated RAM/Flash memory and is designed specifically for the harsh power line and RF environments.

KEY FEATURES

- EV8000 Series – PLC modem SoC: Multi-standard (G3, IEEE P1901.2, PRIME), Multiband (CA, ARIB, FCC)
 - EV8000, EV8010 – Multi-standard
 - EV8100 – Multi- Multi-standard plus application processor and LCD driver
 - EV8020 – PRIME
- EV8600 Series – PLC + RF modem SoC: Multi-standard (G3, IEEE P1901.2, PRIME, LoRa®, 802.15.4g (WiSUN), Wireless MBUS), Multiband (CA, ARIB, FCC, 137MHz-1020MHz)
 - EV8600
 - EV8610

Home Area Network (HAN)

Substation Communications

Power Line Communications

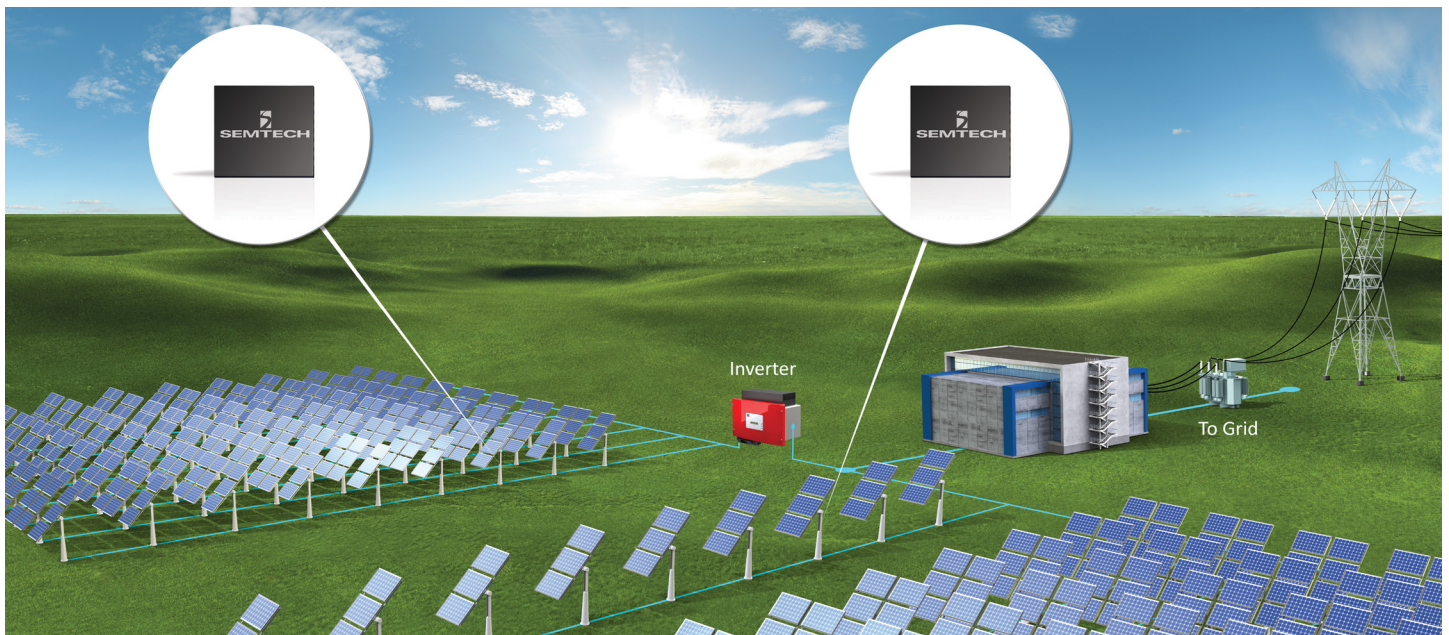

On a broad level, most, if not all, of our PLC SoC applications are tied to Active Energy Management. One of the applications for PLC technology is Advanced Metering Infrastructure (AMI), which allows utility companies to send and retrieve information from residential and industrial meters using power lines that connect directly to their servers. AMI also includes In Home Displays (IHD) and Gateways with which consumers and utility companies can use to control and manage residential energy usage. PLC usage also extends to other applications that use electricity as a source of power and require some (or substantial) intelligence for control and monitoring.

APPLICATIONS

- Advanced Metering Infrastructure (AMI)
- Airport runway lighting
- Internet of Things (IoT)
- Home Area Networks (HAN)
- Smart appliances
- Solar plant control & monitoring
- Street lighting networks
- Substation communications
- Traffic signal control & monitoring

Street Lighting Networks

Solar Plant Control & Monitoring

Wireless Charging Solutions

Semtech offers scalable wireless power transmitter and receiver platforms for both battery charging and power delivery in standard compliant and non-compliant systems. Semtech is a member of the Wireless Power Consortium (WPC) and AirFuel Alliance, and is active in helping shape the future standards for wireless power.

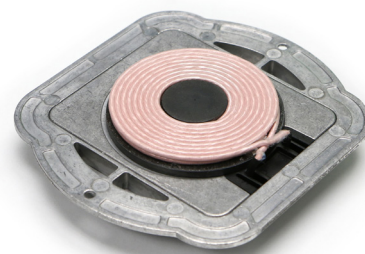

FEATURES

- Firmware-based and programmable
 - Customizable to meet specific application requirements
 - Firmware is upgradable to support evolving standards
- Supports multiple system configurations
 - Multiple supply voltages and coil configurations with the same architecture
 - Supports custom receiver and transmitter coil sizes and inductance values
- Support for medium and high power Tx and Rx solutions
 - Up to 15W for smart phones and tablets
 - >15W for next-generation consumer products and industrial applications
 - 40W and beyond for high power applications such as notebook computers, power tools, and other industrial applications
- Support for low power (0.1W–2W) Tx and Rx solutions
 - Both standard and proprietary solutions
 - Support for very small coils and form-factors
 - Direct charging of batteries at <50mAh

- Multi-standard solutions based on single Tx hardware
 - WPC Qi® + AirFuel Inductive in a single hardware solution
 - WPC Qi® + AirFuel Inductive + Resonant in a single hardware solution

EVALUATION MODULE SERIES

- Low Power Wearables <5W
 - LinkCharge™ LP Series
- Medium Power 5W-15W
 - **LinkCharge™ CT Series**
 - LinkCharge™ 10 Series
 - LinkCharge™ 15 Series
- High Power >15W
 - LinkCharge™ 20 Series

Ultra-low Power Solutions

ULTRA-LOW POWER MANAGEMENT SOLUTIONS

Semtech nanoSmart® ultra-low power technology enables energy savings in everyday products. nanoSmart® products support multiple energy harvesting technologies including indoor and outdoor solar. Off-active™ switching and ultra-low power design result in dissipation in the nano-ampere range, ensuring more energy delivered to the application or storage element. Implementing advanced system power management and scheduled system wake-up is possible with optional microcontroller and real-time clock based solutions making it ideal for remote sensing and control applications.

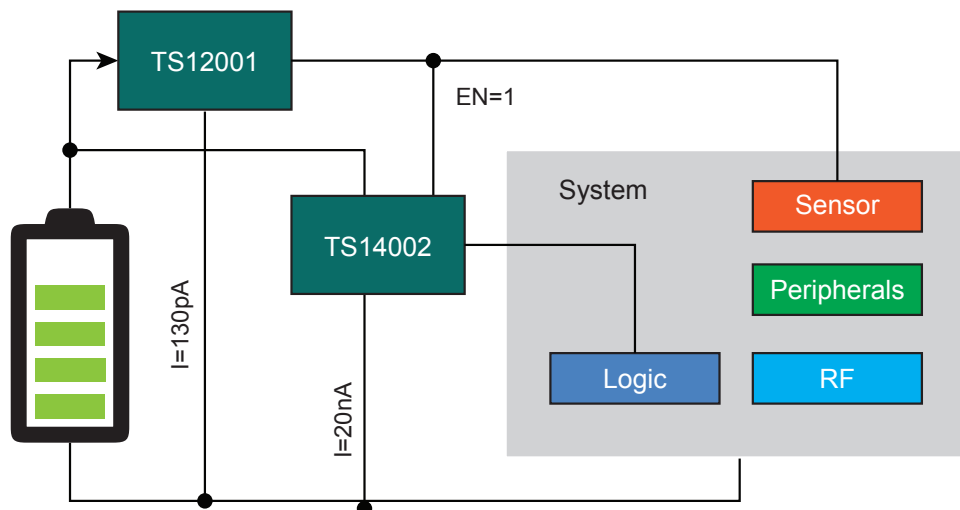

FEATURES

- Lowest standby power in the industry
 - Eliminates standby power losses
 - Quiescent current below battery self-discharge current
- Extends battery life on portable products

APPLICATIONS

- Enables portable standalone low-power
- Background energy scavenging
- Off-grid indoor solar energy harvesting
- Autonomous systems that run forever (i.e. wireless sensors)
- Medical and Industrial

nanoSmart® Solutions			
Part Number	Description	Features	Application
TS12001	Battery management under voltage load switch	Trigger voltage options of 1.2V–4.2V (factory set), 70nA quiescent current	Protects batteries from excessive discharge in portable devices
TS14002	Ultra-low power LDO	$V_{IN} = 2.5V$ to $5.5V$, $V_{OUT} = 1.2V$ – $4.2V$ @250mA (factory set), 20nA quiescent current	Portable battery-operated electronics

TS12001 and TS14002 Block Diagram

Neo-Iso™ Isolated Power Solutions

Neo-Iso™ ISOLATED LOAD SWITCH

Neo-Iso technology from Semtech enhances Internet of Things applications by adding higher levels of intelligence and control. Neo-Iso switches make it possible for low power microcontrollers to control high voltage loads in the system. Reporting of fault conditions from the switch to the controller enables system responses resulting in safer, more efficient operation. Low current draw allows each switch to operate on power harvested from the load eliminating the need for additional supplies. Implemented in proven, volume manufacturing processes, consistently high levels of reliability are achieved throughout the entire operating life. Semiconductor based design allows future scalability and integration options not possible with legacy technologies such as mechanical relays and opto-couplers.

FEATURES

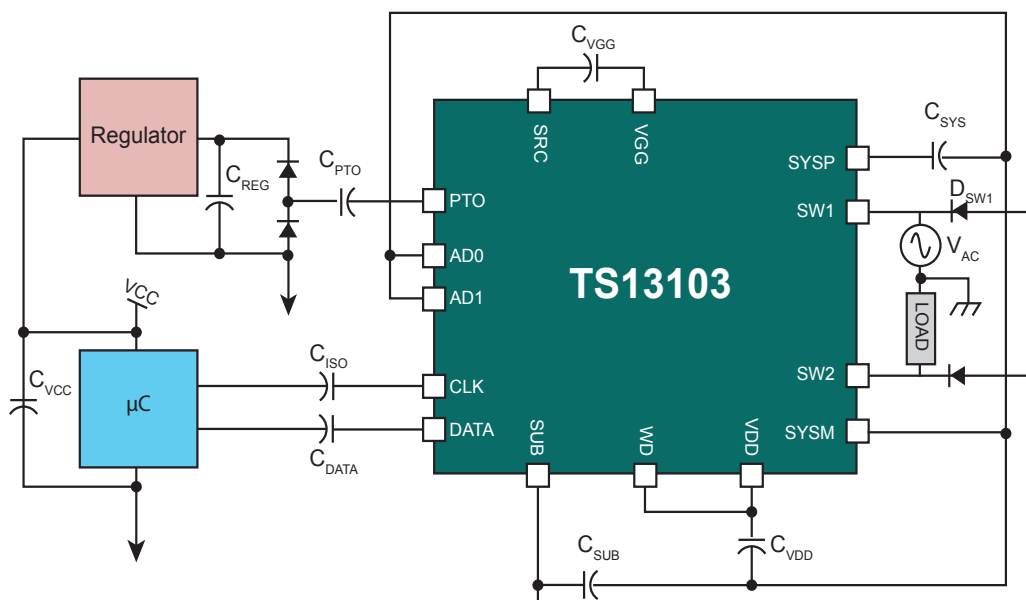

- Overcurrent protection
- Diagnostic information feedback
- Integrated protection devices
- Energy harvesting
- Energy transfer to primary side control
- Scalable galvanic from primary to secondary sides of the device
- Switch Turn-On / Turn-Off Times ~25μS
- Single control signal for on/off input (CLK) Operation Switch
- 60V switch with bi-directional blocking in OFF state
- Low profile allows thin and compact end products
- Silent operation improves user experience

Power Management Solutions

Semtech supplies a wide range of power management ICs used in telecommunications and industrial equipment, portable devices, computers, and networks. Our products include feature rich, highly-integrated products for the telecom industry, and low power, small-package, high-efficiency products for smartphones, handsets, notebook PCs and other portable devices. An established leader in power management ICs across networking and industrial power, handheld power and LED lighting applications, Semtech is pushing performance to higher levels in our quest to enable a totally new class of greener, smarter and smaller end products.

BUCK REGULATORS

With a broad selection of buck converters, Semtech offers some of the world's smallest, high-performance point-of-load (POL) regulators. These include our family of EcoSpeed® converters that set a new standard for efficiency, speed, size and simplicity in emerging green energy applications.

BOOST REGULATORS

Semtech's expanded line of boost converters now includes the world's smallest low-voltage regulators, as well as a growing line of single- and multi-string boost LED drivers for demanding, rugged backlighting applications.

LDOS

A wide range of ultra-low dropout regulators offers ideal solutions for systems where V_{OUT} is very close to V_{IN} .

LED DRIVERS

Semtech manufactures an extensive line of LED driver ICs for LCD display, automotive, backlight, and LED camera flash applications. They include inductor-based boost LED drivers for series-connected LEDs and charge pump LED drivers, and low-dropout current sinks for parallel-connected LEDs. Each LED driver topology is designed for optimal high efficiency in the smallest footprint with accurate current regulation, low noise and a wide dimming range.

CHARGE PUMPS

Semtech's high-performance, charge pump-based converters and LED backlight drivers build on a strong history of charge pump experience providing very high efficiency in the smallest footprint with accurate current regulation, low noise and a wide dimming range.

FEMTOBUCK™ LOAD SWITCHES

Semtech's new load switch products focus on lowest RDS(ON) in class for highest system efficiency and extremely robust protection to withstand the harshest circuit conditions.

Wide Input Voltage Regulators & Controllers

Optical & Networking Solutions

BUILDING THE FUTURE TOGETHER

As networking requirements continue to evolve, so will Semtech. Working with customers to provide solutions for tomorrow's networking challenges. One thing that won't change, however, is Semtech's commitment to being a reliable partner and providing innovative approaches that deliver unrivaled performance for the most sophisticated applications.

ENABLING HIGH PERFORMANCE AND SPEED

- Class leading IC solutions for 25G and 100G applications in CFP, CFP2/4, QSFP28, and SFP28 modules
- Receive Optical Sub-Assembly (ROSA) based on Semtech's Rchip technology
- Full portfolio of integrated solutions to address all SFP+ and XFP modules
- Dual-lane Clock and Data Recovery (CDRs) (Tx/Rx) with integrated DML or EML driver
- Low power, reference-free
- Limiting amplifiers (LA) that provide wideband, low noise post-amplification
- Transimpedance amplifiers (TIAs) that exceed IEEE 10GbE and 100GbE Stressed Receiver Sensitivity (SRS) specifications
- High performance, low power laser drivers
- Full portfolio of integrated solutions for all PON applications including complete reference designs
- Industry's first single-chip 10G PON transceivers for symmetric and asymmetric applications
- Industry's first quad 10Gbps CDR, enabling long reach Infiniband® QDR, 40GbE and 100GbE applications
- Protocol-independent repeaters/redrivers
- Reference design kits for optical modules to decrease design time

MARKETS

100G ETHERNET

- Solutions for QSFP28, CFPx modules

25G ETHERNET

- Market leading module IC and ROSA solutions for SFP28

16G FIBRE CHANNEL

- Industry's first complete integrated IC solution for 16G Fibre Channel

10G

- Complete portfolio of module IC and backplane solutions
- Solutions for XFP, SFP+, QSFP+ modules

PON/FTTH

- Industry's first fully integrated 10G PON solutions
- Highly integrated chipset solutions for EPON & GPON ONU/OLT

TECHNOLOGY

CDRS

- Market leader
- Reference-free operation
- Integrated solutions enable best performance and lowest power

ROSAS

- Best-in-class sensitivity, based on our patented Rchip technology

TIAS

- Industry leading performance and proved reliability with over 300 million sold

LASER DRIVERS & TRANSCEIVER ICs

- High performance integrated solutions for single and multi-channel applications

HD-VLC™ The Future of HD Surveillance

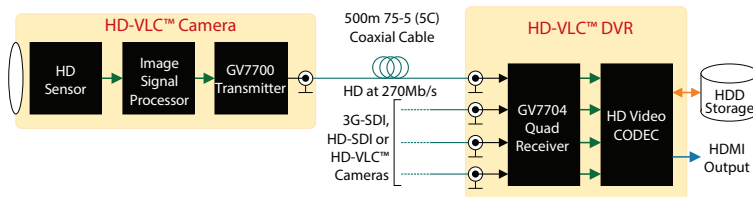

Semtech's next-generation of high-performance, all-digital HD video connectivity solutions for surveillance with integrated HD-VLC™ provide unprecedented levels of cable reach performance and enable long-distance transmission of high-quality HD digital video.

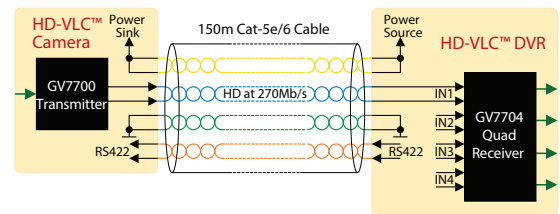

The High-Definition Visually Lossless CODEC (HD-VLC™) has been specifically developed to allow both 720p and 1080p high-definition video to be transmitted at lower data rates over conventional CCTV coaxial cables. Combined with Semtech's industry-leading cable equalizer and CDR technology, cable distances can be extended up to four times the reach of existing HD-SDI and HDcctv 1.0 products, and up to two times the reach of other VLC-based products.

CABLE REACH COMPARISON		
Cable Type	HD-VLC™ 270Mbps	HD-SDI 1.485Gbps

Broadcast Video

Semtech's Gennum Products Group extends its 20+ year leadership in SDI technology by being first to market with an array of advanced UHD-SDI solutions. Semtech's multi-rate device line-up enables customer roadmaps, facilitating the creation of differentiated and advanced UHD-SDI products. We offer the world's most advanced solutions designed specifically for real world broadcast challenges, including the latest innovations designed to help push the boundaries of performance, reach, power, and signal integrity while reducing time-to-market and design risks.

UHD-SDI: THE NEXT-GENERATION BROADCAST TELEVISION PRODUCTION INTERFACE

We offer the most comprehensive end-to-end portfolio of UHD-SDI video solutions available, including our new family of long-reach, multi-rate 12G retiming equalizers and cable drivers, 6G high performance reclockers, low-power 3G equalizer and cable drivers, single-chip configurable cable driver/adaptive cable equalizer (BiDi), and innovative UHD-SDI gearbox solutions.

UHD-SDI: THE NEXT-GENERATION BROADCAST TELEVISION PRODUCTION INTERFACE

New UHD-SDI solutions are needed to enable next-generation broadcast television and D-Cinema applications. UHD-SDI is the only interface for next-generation broadcast

television production for high definition television (HDTV), ultra-high definition television (UHDTV), high dynamic range (HDR), high frame rate (HFR), and wide color gamut (WCG) services.

DEDICATED TO CUSTOMER SUCCESS

Our commitment to customer success is evident in everything we do. That is why we:

- Comprehensively test each component in production, assuring high yield on assembled boards
- Offer complimentary design review and feedback on Semtech-based designs to shorten design cycles, reduce risks and optimize performance
- Provide dedicated field and applications engineering support throughout the product's life-cycle

Adaptive Equalizers						
Part Number	Application	Data Rate (Mbps)	Power (mW)	Outputs	Cable Length (m)	Cable Length Indication
GS12141	12G, 6G, 3G, HD, SD, MADI, low power, long reach	1–11880	350*	2	12G(70), 6G(90), 3G(180), HD(240), SD(400)	Yes
GS3140	3G, HD, SD, MADI, low power, long reach	1–2970	85	1	3G(200), HD(280), SD(500)	Yes
GS6042	6G, 3G, HD, SD, MADI, long reach	125–5940	180	1	6G(80), 3G(210), HD(300), SD(550)	No
GS3440 GS3441	3G, HD, SD, MADI, long reach	125–2970	169 212	1 2	3G(210), HD(250), SD(500)	No Yes
GS2994 GS2993	3G, HD, SD, long reach	143–2970	165 165	1 2	3G(140), HD(200), SD(400)	No Yes
GS1674	HD, SD, long reach	143–1485	195	1	HD(220), SD(400)	No

* Power specifications includes power consumed by integrated retimer

Cable Drivers						
Part Number	Application	Data Rate (Mbps)	Power (mW)	Input Trace EQ	Outputs	Max Output Swing (mV)
GS12181	12G, 6G, 3G, HD, SD, MADI, dual output cable driver	1–11880	340*	Yes	2	1200
GS6080 GS6081	6G, 3G, HD, SD, single or dual output cable driver	143–5940	135 210	Yes	2 4	1800
GS2988 GS2989	3G, HD, SD, single or dual output	143–2970	110 180	Yes	2 4	1800

* Power specifications includes power consumed by integrated retimer

Broadcast Video

Reclockers						
Part Number	Application	Data Rate (Mbps)	Input MUX	Input Trace EQ	Output De-emphasis	Package (mm)
GS6151	6G, 3G, HD, SD, MADI, reclocking with eye monitoring, low power, high density	125, 270, 1485, 2970, 5940	2:1	Yes	Yes	4x4
GS6152	6G, 3G, HD, SD, MADI, reclocking with eye monitoring, low power	125, 270, 1485, 2970, 5940	4:1	Yes	Yes	6x6
GS2985	3G, HD, SD reclocking	270, 1485, 2970	4:1	Yes	Yes	9x9
GS2986	3G, HD, SD reclocking	270, 1485, 2970	4:1	Yes	Yes	6x6
GS2965	3G, HD, SD reclocking, high density	270, 1485, 2970	2:1	Yes	Yes	5x5

Configurable SDI Input/Output - Equalizer/Cable Driver						
Part Number	Application	Data Rate (Mbps)	Power (mW)	Outputs	Cable Reach (m, Belden 1694A)	Package (mm)
NEW GS12090*	12G, 6G, 3G, HD, SD, MADI Configurable EQ/CD (BiDi)	1–11880	EQ: 430** CD: 370**	EQ:1, CD:1	12G(60), 6G(70), 3G(160), HD(230), SD(450)	6x4
GS3490	3G, HD, SD, MADI Configurable EQ/CD (BiDi)	125-2970	EQ: 202 CD: 215	EQ:1, CD:1	3G(140), HD(250), SD(550)	5x5

* GS12090 specifications are preliminary and subject to change ** Power specifications includes power consumed by integrated retimer

Gearbox							
Part Number	SDI Rates	Error and Format detection	SMPTE 352M Handling	Input SKEW adjustment	Per Lane output delay adjustment	Temp Range	Package
GS12070	HD, 3G, 6G, 12G, (270 Bypass)	YES	YES	YES	YES	-40 to +85	BGA196

Transmitters						
Part Number	Data Rate (Mb/s)	Audio Embedded	Output Jitter (ps)	Video Processing	Parallel Bus Width	Power (mW)
GS2972	270, 1485, 2970	Yes	3G(40), HD(50), SD(200)	Yes	10 or 20	400
GS2962	270, 1485, 2970	No	3G(40), HD(50), SD(200)	Yes	10 or 20	350
GS1672	270, 1485	Yes	HD(50), SD(200)	Yes	10 or 20	350
GS1662	270, 1485	No	HD(50), SD(200)	Yes	10 or 20	330

Receivers						
Part Number	Data Rate (Mbps)	Equalizer	Audio De-embed	Audio Clock Generator	Package (mm)	Power (mW)
NEW GS3471*	270, 1485, 2970	Yes	Yes	Yes	100 BGA (9x9)	300
GS3470*	270, 1485, 2970	No	Yes	Yes	100 BGA (9x9)	220
GS2971A	270, 1485, 2970	Yes	Yes	Yes	100 BGA (11x11)	525
GS2961A	270, 1485, 2970	Yes	No	No	100 BGA (11x11)	500
GS2970A	270, 1485, 2970	No	Yes	Yes	100 BGA (11x11)	350
GS2960A	270, 1485, 2970	No	No	No	100 BGA (11x11)	320
GS1661A	270, 1485	Yes	No	No	100 BGA (11x11)	460
GS1660A	270, 1485	No	No	No	100 BGA (11x11)	250

* GS3470/71 specifications are preliminary and subject to change

Crosspoint						
Part Number	Data Rate (Gbps)	Inputs	Outputs	Power (W)	Input Trace EQ	Output De-emphasis
GX3290	3.5	290	290	34	Yes	Yes
GX3190	3.5	146	290	25	Yes	Yes
GX3246	3.5	290	146	18	Yes	Yes
GX3202	3.5	202	202	24	Yes	Yes
GX3146	3.5	146	146	18	Yes	Yes

High Reliability Discretes & Assemblies

Semtech designs and manufactures discrete power diodes that are listed in the QPL, both in axial and surface mount (US) configuration. These rectifier diodes, Zener diodes and TVS diodes are also configured into custom modules and ISOPAC™ packages.

PRODUCTS

- Half wave discrete rectifiers (QPL)
- TVS diodes (QPL)
- Zener voltage regulators (QPL)
- Silicon carbide Schottky barrier diodes
- Diode arrays / assemblies in ISOPAC™ and module packages

JANS – QUALIFIED DIODES

- MIL-PRF-19500/356, 5W Zener voltage regulator (axial and surface mount available)
- MIL-PRF-19500/406, 1.5W Zener voltage regulator (axial and surface mount available)
- MIL-PRF-19500/411, fast recovery rectifier diode (axial available)
- MIL-PRF-19500/420, standard recovery rectifier diode (axial and surface mount available)
- MIL-PRF-19500/427, standard recovery rectifier diode (axial available)
- MIL-PRF-19500/429, fast recovery rectifier diode (axial available)
- MIL-PRF-19500/477, ultra-fast recovery rectifier diode (axial and surface mount available)
- MIL-PRF-19500/516, bipolar transient voltage suppressor (axial and surface mount available)

AVAILABLE IN SPACE GRADE (UPSCREEN*)

- MIL-PRF-19500/ 551, transient voltage suppressor (axial and surface mount available)
- MIL-PRF-19500/ 552, transient voltage suppressor (axial and surface mount available)
- * *Consult factory for other upscreen device options*
- MIL-PRF-19500/578, switching rectifier diode (axial and surface mount available) *Coming Soon*

MODULES

- Epoxy encapsulated rectifier assemblies
- mA to 130A+ and 50V to 225kV+
- Catalog and custom products to source control drawings available

ISOPAC™

- High power density, rugged and reliable high current rectifier assemblies
- Fully hermetic open-frame construction
- 15A to 100A+
- Zero lead length connections for optimal thermal resistance
- Catalog and custom products to source control drawings available

15A Ministud Rectifier

45A Three Phase Full Wave Bridge

Enabling the future of Optical Communications

from 1G to 400G and beyond

With over **half a billion** optical ICs shipped, Semtech's Signal Integrity Products provide the best combination of performance, quality and value in the market.

>200 DATACOM

Single and Multi-Channel Products

- CDR – Clock & Data Recovery (Tx or Rx)
- TIA – Transimpedance Amplifier
- LD – Laser Driver
- LA – Limiting Amplifier

Integrated Variants

- CDR+LD, CDR+TIA, Rx+Tx CDR, LD+LA

>200 VIDEO

Single Channel Products

- RCLK – Reclocker (i.e. a CDR)
- EQ – Equalizer
- CD – Cable Driver
- SER, DES – Serializer, Deserializer

Integrated Variants

- EQ+CD, CD+SER, EQ+DES

SEMTECH CORPORATION

Semtech Corporation is a leading supplier of analog and mixed-signal semiconductor platforms for high-end consumer, computing, communications, and industrial applications. Semtech, publicly traded since 1967, is listed on the Global Select Market under the symbol SMTX and has more than 31 sales and application support offices in 14 countries as well as representatives and distribution support locations in more than 30 countries.

Semtech is dedicated to providing proprietary platforms, differentiated by innovation, size, efficiency, performance and reach. Our solutions are used in some of the most innovative systems and products in the fastest growing markets today.

These markets include smartphones, LCD TVs, notebooks, tablets, smart grid, automotive, automatic meter reading, medical, wireless infrastructure, PON, Internet of Things, optical transport and datacenters. More than 5,000 customers worldwide rely on our diverse product portfolio and world class technology roadmap for solutions in low-power wireless communications, optical data transport, video broadcasting, power management, circuit protection, touch sensing, and more, making Semtech one of the most balanced semiconductor companies in the industry.
