Part Number: B10465 - OptoLyzer Studio LSA Bundle

The OptoLyzer Studio LSA Bundle represents a complete entry level solution for LIN bus analyses consisting of a APGDT001 - LIN Serial Analyzer hardware interface and K2L's OptoLyzer Studio Entry software. The graphical user interface of the software eases the work with the LIN Serial Analyzer (one at a time) and comes with a great number of features that enable hassle-free analysis of LIN, e. g. a Trace View with live logging, message injection and filtering. The software is conveniently activated with the help of a USB license stick (see also OptoLyzer Studio Entry - First Steps).
