#### FEATURES

- Subminiature T-3/4 transfer molded
- · Low package profile
- Axial leads
- Wide viewing angle
- SMT versions

### DESCRIPTION

These T-3/4 subminiature LED lamps feature a squarebase, transfer molded package for surface mount applications. A tinted diffused or water clear epoxy lens — available in AIGaAs red, high-efficiency red, green, and yellow — produces wide-angle beam emission and sharp on/off contrast. They are available with gullwing lead bends for top mounting, as well as yoke lead bends and Z-bends for mounting to the back of a PCB.

### **FEATURES**

- Available in Gullwing, Yoke and Z-bend lead formings
- Compatible with automatic placement equipment
- Compatible with vapor phase reflow soldering processes
- Long life solid state reliability
- Reel and tape or bulk packaging available

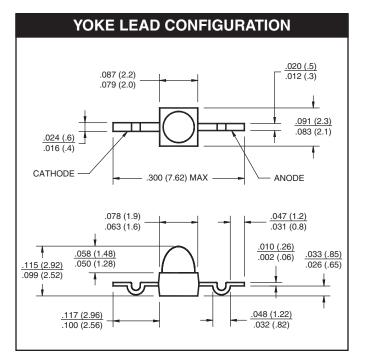

### DESCRIPTION

These subminiature solid state lamps are transfer molded in an axial lead package. They are available in yellow, green, high efficiency red and AIGaAs red in both diffused and water clear lens.

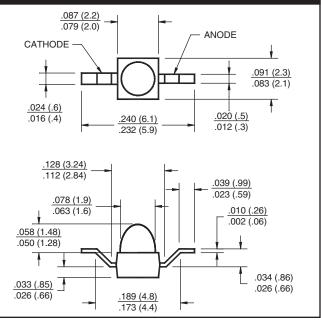

Automatic placement equipment can be used to mount the LEDs on the PC board. The lamps can be mounted using either batch or in line vapor phase reflow solder processes.
