8×9mm Long-travel with High Operation Force (Snap-in Type)

Combination of long travel 1.75mm and high operation force prevents malfunction

■ Typical Specifications

Items	Specifications
Rating (max.)	5mA 12V DC
Rating (min.)	10μA 1V DC
Initial contact resistance	1kΩ max.
Travel (mm)	1.75

■ Product Line

W: Width. The most outer dimension excluding terminal portion.

H: Height. The minimum dimension if there are variances.

TACT Switch™ Soldering Conditions · · · · · · · · · · · · · · · · · · ·	
TACT Switch™ Cautions · · · · · · · · · · · · · · · · · · ·	236

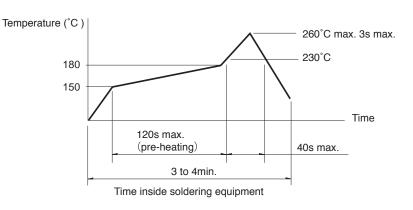

- 1. The automotive operating temperature range to be individually discussed upon request.
- 2. Indicates applicability to all products in the series, while \bigcirc indicates applicability to some products in the series.

D : Depth. The most outer dimension excluding terminal portion.

TACT Switch™ / Soldering Conditions

■ Condition for Reflow Available for Surface Mount Type. Temperature profile

Notes

- 1. Please confirm the specifications of our product for the detailed condition.
- 2. Soldering conditions differ depending on reflow soldering machines. Prior verification of soldering condition is highly recommended.

■ Conditions for Auto-dip

Available for Snap-in Type and Radial Type.

Items	Condition
Flux built-up	Mounting surface should not be exposed to flux
Preheating temperature	Ambient temperature of the soldered surface of PC board. 100°C max.
Preheating time	60s max.
Soldering temperature	260℃ max.
Duration of immersion	5s max.
Number of soldering	2times max.

SKHH Series

Items	Condition
Flux built-up	Mounting surface should not be exposed to flux
Preheating temperature	Ambient temperature of the soldered surface of PC board. 110°C max.
Preheating time	60s max.
Soldering temperature	260°C max.
Duration of immersion	5s max.
Number of soldering	2times max.

SKHL Top Push Type, SKQJ Series

Items	Condition
Flux built-up	Mounting surface should not be exposed to flux
Preheating temperature	Ambient temperature of the soldered surface of PC board. 100°C max.
Preheating time	45s max.
Soldering temperature	255℃ max.
Duration of immersion	5s max.
Number of soldering	2times max.

■ Manual Soldering

Items		Condition
	Soldering temperature	350°C max.
	Duration of soldering	3s max.
	Capacity of soldering iron	60W max.

SKHH, SKHW Series

Items	Condition
Soldering temperature	360°C max.
Duration of soldering	3s max.
Capacity of soldering iron	60W max.

SKTD, SKTG, SKQJ, SKSN Series

Items	Condition
Soldering temperature	350°C max.
Duration of soldering	3s max.
Capacity of soldering iron	20W max.

Notes

- 1. Prevent flux penetration from the top side of the TACT Switch™.
- 2. Switch terminals and a PC board should not be coated with flux prior to soldering.
- 3. The second soldering should be done after the switch is stable with normal temperature.
- 4. Use the flux with a specific gravity of min 0.81. (EC-19S-8 by TAMURA CORPORATION, or equivalents.)
